
BUILDING EVIDENCE-BASED ARGUMENTS

DEVELOPING CORE PROFICIENCIES
ENGLISH LANGUAGE ARTS / LITERACY UNIT

GRADE 10

“the government does not need a search warrant to obtain your personal documents if you have already shared them with somebody else.”

EVIDENCE-BASED ARGUMENTATION

Literacy – the integrated abilities to read texts closely, to investigate ideas and deepen understanding through research, to make and evaluate evidence-based claims, and to communicate one’s perspective in a reasoned way – is fundamental to participation in civic life. Thus, the importance of a literate citizenry was understood and expressed by Thomas Jefferson early in the life of our democratic nation. Today, students face the prospect of participating in a civic life that stretches beyond the boundaries of a single nation and has become increasingly contentious, characterized by entrenched polarization in response to complex issues. Citizens have access to a glut of information (some of which is nothing more than opinion passed off as fact) and are often bombarded by bombast rather than engaged in reasoned and civil debate.

Learning the skills and habits of mind associated with argumentation – how to conceive and communicate “arguments to support claims, using valid reasoning and sufficient evidence” [CCSS W1] as well as how to “delineate and evaluate the argument[s]” and “the validity of the reasoning and relevance and sufficiency of the evidence” presented by others [CCSS R8] – is therefore central to students’ civic and academic lives. In order to participate in thoughtful, reasoned, and civil discussion around societal issues, they must learn: 1) to investigate and understand an issue 2) to develop an evidence-based perspective and position; 3) to evaluate and respond to the perspectives and positions of others; 4) to make, support, and link claims as premises in a logical chain of reasoning; and 5) to communicate a position so that others can understand and thoughtfully evaluate their thinking.

Thus, this unit, as the culminating set of instructional activities in the Core Proficiency series, focuses on aspects of argumentation involving evidence, reasoning, and logic, rather than on persuasive writing and speaking. It moves away from an “editorial” approach that asks students to form an opinion, take a stand, and convince others to agree. Instead, students are first expected to understand objectively a complex issue through exploratory inquiry and close reading of information on the topic, then study multiple perspectives on the issue before they establish their own position. From their reading and research, they are asked to craft an argumentative plan that explains and supports their position, acknowledges the perspectives and positions of others, and uses evidence gleaned through close reading and analysis to support their claims. Having developed a logical and well-supported chain of reasoning, they use an iterative process to develop an argumentative “essay” in the spirit in which Montaigne first used that word – as a progression of “attempts” to communicate their thinking and contribute to reasoned debate about the issue.

The unit’s pedagogy and instructional sequence are based on the idea that students (and citizens) must develop a “mental model” of what effective – and reasoned – argumentation entails, to guide them in reading, evaluating, and communicating arguments around issues to which there are many more than two sides (i.e., most issues in our world today). The unit therefore focuses on learning about and applying concepts communicated through terminology such as issue, perspective, position, premise, evidence, and reasoning. Thus, the unit provides numerous opportunities to build students’ academic vocabularies, while emphasizing close reading and research skills, critical thinking, evidence-based discussion, collaborative development, and an iterative approach to writing.

DEVELOPING CORE PROFICIENCIES SERIES

This unit is part of the Odell Education Literacy Instruction: Developing Core Proficiencies program, an integrated set of ELA units spanning grades 6-12. Funded by USNY Regents Research Fund, the program is comprised of a series of four units at each grade level that provide direct instruction on a set of literacy proficiencies at the heart of the CCSS.

Unit 1: Reading Closely for Textual Details
Unit 2: Making Evidence-Based Claims
Unit 3: Researching to Deepen Understanding
Unit 4: Building Evidence-Based Arguments

The Core Proficiencies units have been designed to be used in a variety of ways. They can be taught as short stand-alone units to introduce or develop key student proficiencies. Teachers can also integrate them into larger modules that build up to and around these proficiencies. Teachers can also apply the activity sequences and unit materials to different texts and topics. The materials have been intentionally designed for easy adaptation to new texts.

Unit materials available at www.odelleducation.com

HOW THIS UNIT IS STRUCTURED

The unit activities are organized into five parts, each associated with a sequence of texts and writing activities. The parts build on each other and can each span a range of instructional time depending on scheduling and student ability.

Part 1 introduces students to the concept of evidence-based argumentation in the context of societal issues. Students read and write about a variety of informational texts to build an understanding of a particular issue.

Part 2 develops student ability to analyze arguments through direct instruction on a set of terms and close reading skills for delineating argumentation. Students read and analyze several arguments associated with the unit's issue.

Part 3 deepens students' abilities with arguments, moving them into evaluation. Students begin to synthesize their analysis and evaluation of other arguments into the development of their own position.

Part 4 focuses students on identifying and crafting the structure of their own arguments, including their sequence of claims and their supporting evidence.

Part 5 engages students in a collaborative, question-based process to develop and strengthen their argumentative essays. Students work with their teachers and peers to draft, revise and publish their own argumentative essay on the unit's issue.

HOW THIS UNIT TEACHES VOCABULARY

This unit draws on a variety of strategies for teaching academic and disciplinary vocabulary. The primary strategy is the way critical disciplinary vocabulary and concepts are built into the instruction. Students are taught words like “claims,” “perspective,” “position,” “evidence,” and “criteria” through their explicit use in activities. Students come to understand and use these words as they think about and evaluate their own analysis and that of their peers. The handouts and tools play a key role in this process. By the end of the unit, students will have developed deep conceptual knowledge of key vocabulary that they can transfer to a variety of academic and public contexts.

The texts and activities also provide many opportunities for academic vocabulary instruction. Many of the activities focus directly on analyzing the way authors use language and key words to develop ideas and achieve specific purposes.

The sequence of topical texts also builds vocabulary knowledge and connections, supporting both textual comprehension and vocabulary acquisition.

The argumentative essays students write at the end of the unit give them the opportunity to immediately use new academic and disciplinary vocabulary they have learned in their reading.

HOW THIS UNIT ALIGNS WITH CCSS FOR ELA/LITERACY

The instructional focus of this unit is on analyzing and writing evidence-based arguments with specific attention to argumentative perspective, position, claims, evidence and reasoning. Accordingly, the primary alignment of the unit – the targeted CCSS – are **RI.1**, **RI.8** and **W.1**, **W.2** and **W.9**.

The sequence of texts and specific instruction emphasize helping students analyze the way different authors’ perspectives and points of view relate to their argumentation. Thus, **RI.6** and **RI.9** are also targeted standards.

In Parts 1-3, students write short pieces analyzing arguments on a societal issue. In Parts 4 and 5, direct instruction supports students in the organization, development, revision and production of a significant and original argumentative essay. As such, **W.4** and **W.5** become targeted standards.

As students develop these primary targeted reading and writing skills, they are also practicing,

their abilities to engage in text-centered discussions. Thus, **SL.1** is also an emerging targeted CCSS as the unit progresses, and takes on a central role in the collaborative process students use in Part 5 for developing and strengthening their writing.

As students develop these primary targeted CCSS skill sets, they also practice and use related reading and writing skills from supporting CCSS. Analysis of texts focuses on interpreting key words and phrases (**RI.4**), determining central ideas (**RI.2**) and the way they interact over the course of a text (**RI.3**), as well as the way authors have structured their particular arguments (**R.5**). The sequence of texts engages students in the analysis of information presented in a variety of media and formats (**R.7**).

UNIT OUTLINE

PART 1: UNDERSTANDING THE NATURE OF AN ISSUE

- The teacher presents an overview of the unit and its societal issue.
- Students read and analyze a background text to develop an initial understanding of the issue.
- Students read and analyze a second background text to expand and deepen their understanding of the issue.
- Students develop text-dependent questions and use them to deepen their analysis.
- Students develop and write an evidence-based claim about the nature of the issue.

PART 2: ANALYZING ARGUMENTS

- The teacher introduces the concept of an argumentative position.
- The teacher leads an exploration of the elements of argumentation.
- Student teams read and delineate arguments.
- The teacher leads an exploration of the concept of perspective.
- Students analyze and compare perspectives in argumentative texts.
- As needed, students read and analyze additional arguments related to the unit's issue.
- Students write short essays analyzing an argument.

PART 3: EVALUATING ARGUMENTS AND DEVELOPING A POSITION

- Students evaluate arguments using objective criteria and their own developing perspective of the issue.
- Students clarify their own emerging perspective and establish a position on the issue.
- If needed, students conduct further research to help develop and support their position.
- Students identify and write about an argument that supports their position.
- Students identify and write about argument that opposes their position.

PART 4: ORGANIZING AN EVIDENCE-BASED ARGUMENT

- Students review their notes and analysis to find evidence to develop and support their position.
- The teacher discusses logical models for building an argument for students to consider.
- Students review and write a sequence of claims to use as premises in their argument.
- Students determine evidence to support their premises.
- Students review and revise their plans for writing with their peers.

PART 5: DEVELOPING AND STRENGTHENING WRITING THROUGH A COLLABORATIVE, QUESTION-BASED PROCESS

- Students learn and practice a collaborative, question-based approach to developing and improving writing, using criteria from the unit and guiding questions to begin the drafting and revision process.
- Students use the collaborative process to revise their writing with a focus on:
 - ◇ articulating their overall ideas with necessary information;
 - ◇ the unity of their initial drafts, coherence among their ideas and information, and logic of their organizational sequence;;
 - ◇ their selection, use, and integration of evidence;
 - ◇ the effectiveness of the connections and transitions they have made, and their use of transitional phrases;
 - ◇ the quality and variety of their sentences, the clarity of their vocabulary, and the impact of their word choices;
 - ◇ writing conventions;
 - ◇ producing a final quality product.

INITIAL DECISIONS TO BE MADE ABOUT THE UNIT'S CONTENT

The unit can be set in any of several content-based contexts. The teacher (and/or students) will need to make direction-setting decisions about which path to follow:

- *If the Building Evidence-Based Arguments unit follows students' previous work in a Researching to Deepen Understanding unit, then the topic area and texts can be carried forward and students will use their research as the basis for developing a position and building an argument. In this case, any of Texts #2-10 from a Topic Repository (e.g., Technology) can be substituted for Texts in Part 1 of this unit, and either re-analyzed or used as a foundation for further research. The teacher or students will need to focus the research topic into one or more areas and develop a problem-based question. Students might then proceed to Parts 3-5 of this unit to develop their positions, organize their arguments, and produce their final written products – as both a culmination of their research and a demonstration of their skills in argumentation.*
- *If the Building Evidence-Based Arguments unit is done on its own, then teachers and students can use this unit to develop their skills of close reading, analysis of an issue, claim-making, and argumentation. Teachers and students may find it helpful to use some of the tools introduced in the Researching to Deepen Understanding unit to organize and archive their work on the various texts in this unit.*
- *If the teacher (or students) intend to do the Building Evidence-Based Argument unit in the context of a different topic, issue, problem, or text set, then texts relevant to that area of study can be substituted the Texts in this unit. In this case, the teacher or students will need to identify a central societal issue, pose a problem-based question, and frame text-specific questions for each of the new texts. They can*

then follow the sequence of instructional activities outlined here using the new topic and texts.

- *If students are expected to develop a research-based argument but have not yet done Researching to Deepen Understanding, they might embark on the Researching to Deepen Understanding unit within their work in the argumentation unit, using activities from the Research Unit to deepen their understanding of the issue and analysis of arguments prior to developing their own positions and arguments in Parts 3-5. In this case, the unit will likely be much longer in duration.*

It is highly recommended that students keep a portfolio of their work throughout the unit where they will keep all tools, group and class discussion notes, and written claims about the passages. This will greatly aid them in Part 4 where they take inventory of their work in the unit, the arguments developed in the texts, and their own synthesis of these arguments. Teachers and students may find it helpful to use some of the tools introduced in the Researching to Deepen Understanding unit to organize and archive their work on the various texts in this unit.

NOTE: While this unit is developmentally appropriate and aligned with the grade-level expectations of the CCSS, it does incorporate analysis of complex texts and the use of explicit academic concepts. It is recommended that it be taught with students who have been introduced to the concepts and have worked on their literacy proficiencies of reading closely for textual detail and making evidence-based claims. These proficiencies can be developed in students with the Units 1 and 2 of the Core Proficiencies Curriculum.

GRADE 10 ARGUMENTATION UNIT TEXT SETS

This chart lists the unit texts, organized by the “text sets” associated with the progression of instructional activities. Additional texts for some of the sets are indicated with an AT.

As an Open Educational Resource, the unit employs texts that are accessible on the web for free without any login information, membership requirements or purchase. Because of the ever-changing nature of website addresses, links are not provided. Teachers and students can locate these texts through web searches using the information provided.

#	TITLE	AUTHOR	DATE	SOURCE/PUBLISHER
Text Set #1: Background Informational Texts				
1.1	The 4 th Amendment, US Constitution	George Mason, James Madison	1789	Cornell Law
1.2	Your Digital Trail: Does the 4 th Amendment Protect Us?	Daniel Zwerdling	10/02/13	National Public Radio
1.3	How has Surveillance Evolved in the United States	Joey Carmichael	6/19/2013	Popular Science
1.4	Electronic Surveillance Under Presidents Bush and Obama	Masuma Ahuja	6/2013	The Washington Post
Text Set #2: Additional Background Informational Texts- 9/11				
2.1	U.S., British intelligence mining data from nine U.S. Internet companies in broad secret program	Barton Gellman and Laura Poitras	6/6/2013	The Washington Post
2.2	The USA Patriot Act: Preserving Life and Liberty	Department of Justice	NA	Department of Justice
2.3	NSA whistleblower Edward Snowden: I don't want to live in a society that does these sorts of things	Glenn Greenwald (interviewer) and Laura Poitras (filmmaker)	6/6/2013	YouTube.com Posted by Kevin Gallagher
2.4	President Bush's remarks at the signing ceremony for the anti-terrorism Patriot Act of 2001	George Bush	10/25/2001	The Washington Post
Text Set #3: Political Cartoons				
3.1	Cartoon Surveillance	Robert Mankoff	6/13/2013	The New Yorker
3.2	NSA Surveillance	Monte Wolverton	7/31/2013	Cagle Cartoons, Inc
Text Set #4: Seminal Arguments				
4.1	Mike Rogers: NSA surveillance program isn't the scandal you think it is	Mike Rogers	6/16/2013	Detroit Free Press
4.2	Letter to Attorney General Eric Holder	Representative James Sensenbrenner Jr.	9/6/2013	Sensenbrenner.house.gov
4.3	Transcript: Obama's Remarks on NSA Controversy	President Barack Obama	6/7/2013	Wall Street Journal - Washington Wire blog
4.4	How the NSA's Surveillance Procedures Threaten Americans' Privacy	ACLU	6/21/2013	ACLU
Text Set #5: Additional Arguments				
5.1	Does the government actually understand the 4th Amendment?	David Sirota	06/17/2013	Salon
5.2	Debate in the Senate on Patriot Act of October 2001	Russ Feingold & Orrin Hatch	10/25/2001	Yale Law School, Avalon Project
5.3	Statement before Senate Committee on The Surveillance Transparency Act of 2013	Kevin S. Bankston	11/13/2013	The Centre for Democracy and Technology
5.4	Report on Government Information Requests	Apple	11/5/2013	Apple

PART 1

UNDERSTANDING THE NATURE OF AN ISSUE

**“We can’t have one hundred percent security
and one hundred percent privacy.” – President Obama**

OBJECTIVE:

Students apply their close reading skills to understand a societal issue as a context for various perspectives, positions, and arguments.

ACTIVITIES

1- INTRODUCING THE UNIT

The teacher presents an overview of the unit and its societal issue.

2- EXPLORING THE ISSUE

Students read and analyze a background text to develop an initial understanding of the issue.

3- DEEPENING UNDERSTANDING OF THE ISSUE

Students read and analyze a second background text to expand and deepen their understanding of the issue.

4- QUESTIONING TO REFINE UNDERSTANDING

Students develop text-dependent questions and use them to refine their analysis.

5- WRITING AN EVIDENCE-BASED CLAIM ABOUT THE NATURE OF THE ISSUE

Students develop and write an evidence-based claim about the nature of the issue.

MATERIALS:

Text Sets 1 and 2
Guiding Questions Handout
Forming EBC Tool
TCD Checklist
EBA Terms

ALIGNMENT TO CCSS

TARGETED STANDARDS:

RI.9-10.1: Cite strong and thorough textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text. **RI.9-10.2:** Determine a central idea of a text and analyze its development over the course of the text, including how it emerges and is shaped and refined by specific details; provide an objective summary of the text. **RI.9-10.3:** Analyze how the author unfolds an analysis or series of ideas or events, including the order in which the points are made, how they are introduced and developed, and the connections that are drawn between them. **W.9-10.2:** Write informative/explanatory texts to examine and convey complex ideas, concepts, and information clearly and accurately through the effective selection, organization, and analysis of content.

SUPPORTING STANDARDS:

SL.9-10.1: Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others’ ideas and expressing their own clearly and persuasively. **RI.9-10.4:** Determine the meaning of words and phrases as they are used in a text, including figurative, connotative, and technical meanings; analyze the cumulative impact of specific word choices on meaning and tone (e.g., how the language of a court opinion differs from that of a newspaper).

ACTIVITY 1: INTRODUCING THE UNIT

The teacher presents an overview of the unit and its societal issue.

INSTRUCTIONAL NOTES

INTRODUCE ARGUMENTATION

Introduce the central purpose of the unit: to develop, practice, and apply the skills of argumentation in the context of a societal issue by:

- 1) Understanding the nature of a challenging *issue* for which there are various *perspectives* and *positions*.
- 2) Understanding and comparing *perspectives* and *arguments* on the issue.
- 3) Developing an evidence-based *position* on the issue.
- 4) Developing, sequencing and linking *claims* as *premises* in an evidence-based *argument* for one's position.
- 5) Supporting one's premises with logical *reasoning* and relevant *evidence*.
- 6) Developing an argumentative *essay* through a series of guided editorial processes.

Emphasize that in this unit, students will learn and think about a complex societal issue for which there are many explanations, perspectives, and opinions, not simply two sides of an argument to be debated. Let them know that they will read and research to better understand the issue and various perspectives on it *before* they form a position of their own and develop an argument in support of that position. Explain that the unit will culminate in a collaborative process for developing and strengthening an argumentative essay that each student will write on the unit's societal issue.

- Establish a clear definition of the term *issue* in general. An issue can be defined as *an important aspect of human society for which there are many differing opinions on an appropriate course of action*. Brainstorming a list of societal issues might be helpful.
- Using examples from various fields and topical areas, discuss the general question: *"How do strategic thinkers discuss and understand challenging issues or problems?"* Brainstorm a list of approaches and skills used by experts who regularly have to propose and support responses to issues or problems.

PRIVACY/SECURITY

The topic area and text set for this unit focuses on the governance of upholding the 4th Amendment, and more specifically on the issues and controversies that surfaced when Eric Snowden blew the whistle on the National Security Agency's (NSA) domestic surveillance program. The tension that exists between the government's obligation to protect citizens' rights as upheld by the US Constitution and its obligation to ensure the same citizens' security is complex. The point where security and freedom are appropriately balanced is difficult to find and many possible perspectives and positions on this debate exist, which allows the teacher and students to approach and study the issue from many possible angles.

FORMULATE A PROBLEM-BASED QUESTION

Formulate a problem-based question from which students can begin their discussions, reading, and development of an argumentative position. Choose or develop a general, though still focused, question that causes students to think about the problem with many directions for argumentation, and that connects to students' backgrounds and interests. An example/option for a problem-based question with a political context is:

What is the appropriate balance between a US citizen's right to privacy and the government's responsibility to protect its citizens?

TEXT-BASED QUESTION

If this question is selected, or a similar one developed, provide an entry point into the debate with a text that students can relate to and presents the debate in a way that is accessible to all students. There are a few different videos that work well to help frame the issue for students. One is the cell phone surveillance scene from the movie "Batman: Dark Knight" where characters Batman and Lucius Fox debate about whether or not to use a mass spy tool on citizens in order to disrupt a terrorist plot. Another is from the movie "Bourne Identity," where government agents are able to track down Bourne and his companion Marie, by instantly tapping into information online. A third option is to show Edward Snowden's Christmas 2013

ACTIVITY 1: INTRODUCING THE UNIT (CONT'D)

INSTRUCTIONAL NOTES (CONT'D)

message where he warns of a worldwide surveillance system that “a child born today will grow up with no conception of privacy at all.”

The following text-based questions about the Batman scene model provide a first opportunity for close analysis.

What disagreement do Lucius and Batman have over the use of cell phone surveillance? How is the decision made to use the defense system despite Lucius’ objection? What implications does this decision have in the debate about what is more important – a citizen’s safety or privacy?

Let students know that they will be returning to these types of questions often as they read texts related to the 4th Amendment which deals specifically with the right to privacy, and the NSA surveillance program which is similar to Batman’s surveillance program on

Gotham. Emphasize that they will be making connections between this clip and their learning throughout the unit and they will use it as a stimulus for reading and discussion. It will also support students as they create their own understanding of the debate and build an evidence-based argument based on their own informed position on the security vs. freedom debate.

KWL

Teachers might choose to use an activity to help students access their prior knowledge of the subject while also making sure to be careful of erroneous prior conceptions of the topic (KWL, class brainstorm, image brainstorm, free write, etc.).

ACTIVITY 2: EXPLORING THE ISSUE

Students read and analyze a background text to develop an initial understanding of an issue.

INSTRUCTIONAL NOTES

READING

- Students read the text independently, annotating and making notes on how it relates to the unit’s problem-based question.
- The teacher introduces one or more text-based questions to drive a closer reading of the text. Students then follow along as the text is presented to them.
- In reading teams, students discuss the text-based questions and search for relevant details, highlighting and annotating them in their text (and might use a *Forming EBC* tool to record their thinking).

WRITING CLAIMS

- The teacher models the development and writing of an explanatory claim that addresses something the text has presented about the unit’s issue. The claim is explanatory not argumentative at this point.

- Students individually develop explanatory claims about the text’s presentation of the issue (a *Forming EBC* tool can be used).
- In reading teams, students compare claims and the evidence they have found to derive and support them.

Students write a short claim-based synopsis of the text and the information it presents about the nature of the issue or problem, citing specific details and evidence to support their explanatory claim. [NOTE: Emphasize that at this point in the process, student claims should focus on interpreting what the text says about the nature of the issue, not on the validity of the text’s perspective or position and *not* on articulating the student’s own, still-developing position. Those sorts of claims will come later.]

ACTIVITY 2: EXPLORING THE ISSUE (CONT'D)

INSTRUCTIONAL NOTES (CONT'D)

NOTE ON TEXT SETS

Instruction in this unit links to a sequence of *text sets*. Each text set provides multiple entry points into the issue, giving teachers and students flexibility with respect to the time and depth with which they wish to explore the topic.

Teachers may choose to use the text sets in a variety of ways:

- Select one of the three texts for all students to read, analyze, and discuss. Provide links to the other two so that students can do additional reading if desired.
- Have all students read, analyze, and discuss all three texts (or two of the three) in a more extended instructional time sequence.
- Place students in “expert groups” and have them read and analyze one of the three texts. Then have students “jigsaw” into cross-text discussion groups to share and compare what they have learned from the text each has read. [Note: students might be grouped by reading level and assigned texts based on their complexity/difficulty.]

TEXT SET #1: TEXTUAL NOTES

Text Set I includes three texts that can be used to provide initial background information about the 4th Amendment, a historical perspective of surveillance in the US, and more specifically, surveillance since 9/11.

TEXT 1.1: “THE 4TH AMENDMENT, US CONSTITUTION”

Author: George Mason, James Madison, (there were several authors, however, these two are credited the most); **Source/Publisher:** Cornell Law; **Date:** 1789

Complexity Level: Measures at 1970L and is also considered a complex text due language and syntax typical of law documents.

Text Notes: As part of the Bill of Rights, the 4th Amendment is a seminal text and serves as a wonderful introduction to this unit’s focus. While brief in words, the amendment’s language and syntax may make the 4th Amendment initially difficult to access for some students. Specifically, teachers may need to cover words such as “persons, effects, warrants, and probable cause” for students to fully appreciate the text. Have students read through the text twice, noting important details or words that stand out to them.

Sample Text-Dependent Questions (to drive closer reading and discussion):

1. What specific rights does the 4th Amendment protect?
2. What actions does the 4th Amendment say would be illegal? What actions does the 4th Amendment say would be legal? How do you know?
3. How does the evidence provided in this text influence your understanding of the issue of government surveillance and personal privacy?

ACTIVITY 2: EXPLORING THE ISSUE (CONT'D)

TEXT SET #1: TEXTUAL NOTES

TEXT 1.2: "YOUR DIGITAL TRAIL: DOES THE 4TH AMENDMENT PROTECT US?"

Author: Daniel Zwerling; **Source/Publisher:** National Public Radio; **Date:** October 2, 2013

Complexity Level: At 1160L, this text is less complex than the amendment itself so students can more easily understand the amendment and how it applies to the modern day world.

Text Notes: This text should be used to build a greater understanding of the 4th Amendment. The author uses a familiar movie, *The Bourne Identity*, as a backdrop to discuss the implications technology has on government's ability to conduct surveillance and the resulting privacy concerns. Perhaps of greatest interest, the author states, "since the 1960s and 1970s, the Supreme Court and other courts have issued a series of rulings declaring that the government does not need a search warrant to obtain your personal documents if you have already shared them with somebody else." The effects of these decisions in the digital age are tremendous, as the author points out. The article does a great job bridging the gap between the difficult language of the amendment to the digital medium most students are more familiar with today.

Sample Text-Dependent Questions (to drive closer reading and discussion):

1. What line from the 4th Amendment does the author specifically quote in his article?
2. What evidence does the author use to support the legal analysts' claim that "the world of computers has weakened the Fourth Amendment?"
3. What details from the article best describe the words "persons, houses, papers, and effects" as used in the 4th Amendment?
4. At the end of the 13th paragraph the author writes, "It's the legal version of the lesson you learned when you were 12 years old: If you don't want anybody else to read your diary then don't show it to anybody." According to the author, how have older laws, when combined with new technology, aided the government in conducting surveillance programs?
5. How does the evidence provided in this text influence your understanding of the issue of government surveillance and personal privacy?

TEXT 1.3: "HOW HAS SURVEILLANCE EVOLVED IN THE UNITED STATES"

Author: Joey Carmichael; **Source/Publisher:** Popular Science; **Date:** June 19, 2013

Complexity Level: The timeline format chunks text into small sections, making it very accessible for students, particularly if they only focus on reading a few sections of the timeline closely.

Text Notes: This timeline provides students with an introduction and overview of the role surveillance has played throughout American history. The timeline is also meant to communicate to students that Americans conducting surveillance on other Americans is not a new idea. It also shows how specific events and developments throughout history have changed what kinds of surveillance are allowed and not allowed. This text further strengthens the ideas proposed in the previous text about the changing interpretation of the 4th Amendment over time.

ACTIVITY 2: EXPLORING THE ISSUE (CONT'D)

TEXT SET #1: TEXTUAL NOTES

Sample Text-Dependent Questions (to drive closer reading and discussion):

1. What do you notice about how this timeline is structured? Be specific about the details you notice.
2. Using details from the timeline explain what is meant by the word “surveillance” in the title?
3. Why did the author use the adoption of the 4th Amendment as the starting point of this timeline? How do the subsequent examples relate to the amendment?
4. How does the *Katz v United States* slide clarify what “search and seizure” means?
5. How are the events that have caused the government to expand its surveillance on Americans connected? What patterns do you see?
6. How does the evidence provided in this text influence your understanding of the issue of government surveillance and personal privacy?

TEXT 1.4: “ELECTRONIC SURVEILLANCE UNDER PRESIDENT BUSH AND OBAMA”

Author: Masuma Ahuja; **Source/Publisher:** The Washington Post; **Date:** June 2013

Complexity Level: The timeline format chunks text into small sections, making it very accessible for students, particularly if they only focus on reading a few sections of the timeline closely.

Text Notes: This timeline provides students with a focused look at how the government has conducted surveillance under Presidents Bush and Obama, as well as the direct connection that is made between surveillance of Americans and the threat of terrorism. The timeline strengthens students’ background knowledge of the tension that exists between security and privacy.

Sample Text-Dependent Questions (to drive closer reading and discussion):

1. In what way does the author connect the September 11th attacks to the government’s role in conducting surveillance on American citizens?
2. According to the timeline, what piece of legislation plays the most significant role in government surveillance history?
3. Which events on the timeline represent the shrinking or expanding of government surveillance on US Citizens? What caused the government to shrink or expand their role in conducting surveillance on US citizens?
4. On June 6, 2013, President Obama said, “nobody is listening to your calls.” What then, according to the President, is the government actually looking for?
5. How does the evidence provided in this text influence your understanding of the issue of government surveillance and personal privacy?

ACTIVITY 3: DEEPENING UNDERSTANDING OF THE ISSUE

Students read and analyze a second background text to expand and deepen their understanding of the issue.

INSTRUCTIONAL NOTES

READING

- Students read the text independently, annotating and making notes on how it relates to the unit’s problem-based question.
- The teacher introduces one or more text-based questions to drive a closer reading of the text. Students then follow along as the text is presented to them.
- In reading teams, students discuss the text-based questions and search for relevant details, highlighting and annotating them in their text (and might use a *Forming EBC* tool to record their thinking).

WRITING CLAIMS

- The teacher models the development and writing of an explanatory claim that addresses something the

text has presented about the unit’s issue. The claim is explanatory not argumentative at this point.

- Students individually develop explanatory claims about the text’s presentation of the issue (a *Forming EBC* tool can be used).
- In reading teams, students compare claims and the evidence they have found to derive and support them.

Students write a short claim-based synopsis of the text and the information it presents about the nature of the issue or problem, citing specific details and evidence to support their explanatory claim. [NOTE: Emphasize that at this point in the process, student claims should focus on interpreting what the text says about the nature of the issue, not on the validity of the text’s perspective or position and *not* on articulating the student’s own, still-developing position. Those sorts of claims will come later.]

TEXT SET #2: TEXTUAL NOTES

Text Set #2 includes three texts that can be used to provide additional background information about the security vs. privacy debate including the enactment of the Patriot Act, and the current case involving “whistle-blower” Eric Snowden.

TEXT 2.1: “U.S., BRITISH INTELLIGENCE MINING DATA FROM NINE U.S. INTERNET COMPANIES IN BROAD SECRET PROGRAM”

Author: Barton Gellman and Laura Poitras; **Source/Publisher:** The Washington Post; **Date:** June 6, 2013

Complexity Level: At 1460L, this text measures high due to formal nouns and several acronyms. The text is a newspaper article and is suitable for most 10th grade students. Viewing the video embedded in the article will help support comprehension of the key ideas.

Text Notes: This newspaper article mostly focuses on the secretive, surveillance program run by the National Security Agency and the FBI called PRISM, as well as its equivalent in Britain. As the authors point out, these government agencies obtain digital information directly from well-known companies such as Facebook, Google and Apple. After reading the article, students can watch the video, which is an interview with Barton Gellman, one of the article’s authors. The interview provides a good opportunity to review key information presented in the article and to access the information in a different medium.

ACTIVITY 3: DEEPENING UNDERSTANDING OF THE ISSUE (CONT'D)

TEXT SET #2: TEXTUAL NOTES

Sample Text-Dependent Questions (to drive closer reading and discussion):

1. The authors point out that in the past the NSA has used relationships with corporate entities in order to conduct its operations [paragraph 2]. How do the authors suggest that the PRISM program is different from these past relationships?
2. The authors make the claim that the government has shifted from individual to mass surveillance. What supporting evidence do they provide to substantiate their claim?
3. According to the article, how have most private companies (Apple, Twitter, etc.) responded to questions over their relationship with government agencies?
4. In the video, Gillman discusses the role of the “source” in providing the authors access to secret information. What explanation does Gellman give for withholding certain information from the public? According to Gellman, why did the source give up this information?
5. How does the evidence provided in this text influence your understanding of the issue of government surveillance and personal privacy?

TEXT 2.2: “THE USA PATRIOT ACT: PRESERVING LIFE AND LIBERTY”

Author/Source/Publisher: Department of Justice; **Date:** NA

Complexity Level: The government website measures at 1450L mostly due to its linguistic style. However, this text is made accessible due to its clear organization, bolded lettering and numbered paragraphs.

Text Notes: This text, published by the Department of Justice, provides students background knowledge on the Patriot Act. They will have already seen some information on this piece of legislation from reading prior articles and timelines in the set, however, this is their first chance to learn about the Act in more depth. In the post 9/11 scenario, the Patriot Act was and continues to be one of the most crucial and controversial pieces of government legislation in history. As the website claims, this Act greatly enhances the government’s ability to fight terrorism, describing specifically how specific components improves counter-terrorism efforts.

Sample Text-Dependent Questions (to drive closer reading and discussion):

1. In the first paragraph, what effect does the quote from Senator Joe Biden have on the text’s message?
2. Point number 3 claims, “the Patriot Act updated the law to reflect new technologies and new threats.” What evidence is given to back up the claim? How does this evidence relate to what you have learned about the 4th Amendment?
3. How does the evidence provided in this text influence your understanding of the issue of government surveillance and personal privacy?

ACTIVITY 3: DEEPENING UNDERSTANDING OF THE ISSUE (CONT'D)

TEXT SET #2: TEXTUAL NOTES

TEXT 2.3: "NSA WHISTLEBLOWER EDWARD SNOWDEN: 'I DON'T WANT TO LIVE IN A SOCIETY THAT DOES THESE SORTS OF THINGS' "

Authors: Glenn Greenwald (interviewer) and Laura Poitras (filmmaker);

Source/Publisher: Posted by Kevin Gallagher on YouTube.com, 12:35 minutes; **Date:** June 6, 2013

Complexity Level: NA. This is the video of an interview with whistleblower Edward Snowden. The question-answer style makes the content easy to follow and both Greenwald and Snowden's slow speech should make this video accessible to 10th graders.

Text Notes: In his first interview with a reporter in Hong Kong, former NSA analyst discusses his decision to reveal top-secret information about the government agency's surveillance programs. As a whistleblower, Edward Snowden was forced to evade capture by US forces or friendly countries and promptly relocated to Russia after making this video. As of January 2014, the video has received over 2,600,000 "hits," as it clearly represents an important event in government surveillance and privacy debate.

Sample Text-Dependent Questions (to drive closer reading and discussion):

1. Throughout the interview, Snowden comes back to the public's right to decide on what is right for them. What does he mean by this? How does this run counter to the government's efforts?
2. In the interview, Snowden claims, "I, sitting at my desk, certainly had the authority to target anyone." If true, how would this run counter to the 4th Amendment?
3. According to Snowden, where does "probable cause," as stated in the 4th Amendment, figure in the government's surveillance program?
4. How does the evidence provided in this text influence your understanding of the issue of government surveillance and personal privacy?

TEXT 2.4: "BUSH'S REMARKS AT THE SIGNING CEREMONY FOR THE ANTI-TERRORISM PATRIOT ACT OF 2001"

Author: George Bush; **Source/Publisher:** Washington Post; **Date:** October 25, 2001

Complexity Level: This text measures at 1040L and should be accessible for 10th graders.

Text Notes: In his speech upon signing the Patriot Act into Law after 9/11, President Bush comments on the efficacy with which the government will now be able to run counter-terrorism efforts. While not as detailed as the text by the Department of Justice, this highly accessible speech will give students further understanding of the urgency and implications under which the Patriot Act was made law. The country had just experienced one of the most horrendous attacks since Pearl Harbor and the government acted swiftly in order to equip the justice and intelligence community with what it considered the necessary "tools" to stop attacks like those that occurred on 9/11. The teacher should be sure to point out the date of this speech – October 25, 2001, a mere 6 weeks after the attacks.

Sample Text-Dependent Questions (to drive closer reading and discussion):

1. How does the President describe the terrorists? What specific details does he use to characterize them?
2. According to the speech, in what ways does the Patriot Act improve the government's counter-terrorism efforts?
3. How does the evidence provided in this text influence your understanding of the issue of government surveillance and personal privacy?

ACTIVITY 4: QUESTIONING TO REFINE UNDERSTANDING

Students develop text-dependent questions and use them to find additional evidence and further refine their claims.

INSTRUCTIONAL NOTES

QUESTIONING TEXTS

Students now apply skills they have developed in a *Reading Closely for Textual Details* unit to frame their own, more focused questions about the issue and texts. They use these questions to drive a deeper reading of the previous texts, or of additional texts providing background and perspectives on the topic.

- Starting from the unit’s problem-based question, students work in reading teams to develop a set of more focused, text-based questions to drive further inquiry into the issue. (Students can use the *Reading Closely for Details: Guiding Questions* handout to help them develop their questions.)
- Individually, students use these new questions to re-read one of the two background texts, find additional details, and further refine their explanatory claim.
- *If additional background information is necessary or desired*, students then use their question sets to drive close reading and analysis of one or more additional texts. (Note: Suggested texts are listed in the Instructional Notes or may be identified by the teacher or found by the students. Students might work in teams to become “experts” and develop explanatory claims about one or more of these additional texts, then “jigsaw” into new groups and share what they have learned. In this way, all students can become familiar with a wider range of background texts.)
- Students write or revise one or more explanatory claim(s) based on additional evidence they have found through further or deeper reading.

TEXTUAL NOTES

ADDITIONAL BACKGROUND TEXTS

To expand their understanding of the topic, students might be assigned any of the texts from Text Sets #1 and #2 that have not been read by the class. They might also access other sources found by the teacher (or by students themselves) or the additional source texts listed in the unit plan.

Those five listed source texts provide additional, and different, information about security vs. privacy debate in the US, and can be used to expand students’ understanding and/or as independent reading/research assignments. “Everything you need to know about the NSA’s phone records scandal” provides information about what the NSA can obtain about citizens from their phone records as well as identifies different perspectives on the issue. “Public Opinion Shifts on Security-Liberty Balance” compares a July 2013 poll to a January 2010 poll which shows there has been a shift in public opinion indicating more Americans now believe the government has gone too far in restricting civil liberties regarding privacy. The CNN article provides multiple op-eds on the issue of privacy vs. security. Finally, the text of the Verizon Court order from the Foreign Intelligence Surveillance Court provides students with a primary source document that directly relates to information they read in the Gellman article. Specifically, the document shows exactly what kind of information the government asks Verizon to release about its customers and the kind of secrecy under which the order was given.

ACTIVITY 5: WRITING AN EBC ABOUT THE NATURE OF THE ISSUE

Students develop and write an evidence-based claim about the nature of the issue.

INSTRUCTIONAL NOTES

In the culminating activity for Part 1, students now develop a synthesis claim about the nature of the issue that they will expand and revise when drafting their final argument. Before they can take a position and make their case for a response, they must be able to use evidence to explain their understanding of the issue or problem.

- The teacher models the development of an evidence-based claim that synthesizes information from multiple sources and presents the writer's understanding the unit's issue.
- In reading teams, students go back to the background texts to find additional evidence/details that support this synthesis claim. (An *Organizing EBC* tool can be used).
- In reading teams, students review the explanatory claims they wrote about each text.
- In reading teams, students brainstorm alternative ways of viewing or understanding the problem, based on evidence from the background texts.
- Individually, students develop a multi-part claim that synthesizes how they have come (so far) to view and understand the nature of the issue and its components. (An *Organizing EBC* tool can be used).
- In reading teams, students compare their synthesis claims and the evidence that supports them.
- If teachers and students are familiar with the *Evidence-Based Claims Criteria Checklist* and the *Text-Centered Discussion Checklist* from work in previous units, students can use them as criteria for evaluating their claims and reflecting on their discussions and participation in their reading teams.
- As a class, return to the unit's problem-based question to consider revising it based on the emerging understanding of the issue.

ASSESSMENT OPPORTUNITIES

As a formative assessment, and a building block for their final argument, in Activity 5, students draft a written, multi-part claim that:

1. Synthesizes what they have learned about the nature of the unit's issue.
2. Presents their current way of understanding the issue and its components.
3. Cites evidence from multiple sources that explains and substantiates their perspective.
4. Represents their best thinking and clearest writing.

Teachers can use an *EBC Criteria Checklist* to evaluate student writing as well as each student's initial comprehension of the background texts and understanding of the issue.

PART 2

ANALYZING ARGUMENTS

“We're dealing with terrorists who operate by highly sophisticated methods and technologies, some of which were not even available when our existing laws were written.” – President Bush

OBJECTIVE:

Students delineate and analyze the position, premises, reasoning, evidence and perspective of arguments.

ACTIVITIES

1- UNDERSTANDING ARGUMENTATIVE POSITION

The teacher introduces the concept of an argumentative position through a discussion of the unit's issue.

2- IDENTIFYING ELEMENTS OF AN ARGUMENT

The teacher leads an exploration of the elements of argumentation in an everyday context.

3- DELINEATING ARGUMENTATION

Student teams read and delineate arguments.

4- UNDERSTANDING PERSPECTIVE

The teacher leads an exploration of the concept of perspective in an everyday context.

5- COMPARING PERSPECTIVES

Students analyze and compare perspectives in argumentative texts.

6- DELINEATING ADDITIONAL ARGUMENTS

As needed, students read and analyze additional arguments related to the unit's issue.

7- WRITING TO ANALYZE ARGUMENTS

Students write short essays analyzing an argument.

MATERIALS:

Text Sets 3-5
Forming EBC Tool
Delineating Arguments Tool
Model Arguments
TCD Checklist
EBA Terms

ALIGNMENT TO CCSS

TARGETED STANDARDS:

RI.9-10.6: Determine an author's point of view or purpose in a text and analyze how an author uses rhetoric to advance that point of view or purpose. **RI.9-10.8:** Delineate and evaluate the argument and specific claims in a text, assessing whether the reasoning is valid and the evidence is relevant and sufficient; identify false statements and fallacious reasoning. **RI.9-10.9:** Analyze seminal U.S. documents of historical and literary significance, including how they address related themes and concepts.

W.9-10.2: Write informative/explanatory texts to examine and convey complex ideas, concepts, and information clearly and accurately through the effective selection, organization, and analysis of content.

SUPPORTING STANDARDS:

RI.9-10.1: Cite strong and thorough textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text. **RI.9-10.2:** Determine a central idea of a text and analyze its development over the course of the text, including how it emerges and is shaped and refined by specific details; provide an objective summary of the text.

RI.9-10.3: Analyze how the author unfolds an analysis or series of ideas or events, including the order in which the points are made, how they are introduced and developed, and the connections that are drawn between them.

RI.9-10.4: Determine the meaning of words and phrases as they are used in a text, including figurative, connotative, and technical meanings; analyze the cumulative impact of specific word choices on meaning and tone. **SL.9-10.1:** Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.

W.9-10.9: Draw evidence from literary or informational texts to support analysis, reflection, and research.

ACTIVITY 1: UNDERSTANDING ARGUMENTATIVE POSITION

The teacher introduces the concept of an argumentative position through a discussion of the unit’s issue.

INSTRUCTIONAL NOTES

In Part 2 discussion and instruction shifts from the previous focus on understanding the background and nature of the unit’s issue to a focus on the various controversies, or differences of opinion, that have surrounded the issue historically and/or currently, and have led to various positions and arguments.

CLASS BRAINSTORM

- As a class, brainstorm a list of questions that highlight various points of controversy or debate within the issue. If applicable, this can be related to the initial prior-knowledge/KWL activity.
- *How has the interpretation of the 4th Amendment changed over the years?*

The questions might address the current realm for debate related to US surveillance programs, e.g.:

- *If there is no 100% security or 100% privacy, do all counter-terrorism efforts potentially violate the 4th Amendment?*

They can also examine aspects of the topic that are more peripheral to the central debate, but may still be very relevant, e.g.:

- *Should companies such as Verizon and Apple be able to deny requests granting government agencies access to mass information on their customers’ interactions and use of services?*

INTRODUCE CONCEPT OF POSITION

All questions, however, should be framed in a manner that suggests multiple ways of responding, that prepares students to examine various perspectives from which an answer could come as well as various positions that might be taken in response to the topic and question.

- Discuss with students how each of these questions can be responded to in various ways.
- Introduce the term *position*, which can be defined as *someone’s stance on what to do or think about a clearly defined issue based on their perspective and understanding of it. When writing argumentative essays, one’s position may be expressed as a thesis.*
- Discuss how the term relates to points of controversy in the issue.

CARTOON ANALYSIS

- Distribute Text Set #3, a set of political cartoons related to the unit’s issue. Use one example to model how the cartoon can be seen as expressing a *position* on the issue.
- As a class discuss the various “positions” expressed in the cartoons. Discuss how argumentative essays develop arguments to support positions. Ask if students see the beginnings of any basic arguments to support the position in the visual details of the cartoons, and discuss the evidence they identify.

TEXT SET #3: TEXTUAL NOTES

TEXT 3.1: “CARTOON SURVEILLANCE”

Author: Robert Mankoff (ed.); **Source/Publisher:** The New Yorker; **Date:** June 13, 2013

TEXT 3.2: “NSA SURVEILLANCE”

Author: Monte Wolverton; **Source/Publisher:** Cagle Cartoons; **Date:** July 31, 2013

Text Notes: Provided are two sites from the New Yorker and Editorial Cartoonists that provide several political cartoons on the topic of government surveillance. The teacher (and/or students) can browse either or both of these sources and find cartoons that relate to the unit’s focus, the problem-based question, and the set of debatable questions generated in Activity 1. Teachers are encouraged to conduct their own web searches in order to include the most current political cartoons, or cartoons appropriate for the specific classroom context.

ACTIVITY 1: UNDERSTANDING ARGUMENTATIVE POSITION (CONT'D)

TEXT SET #3: TEXTUAL NOTES

Once cartoons are selected, students should “read” them closely by visually scanning for key details and presentation techniques, considering also any text that may be presented with the cartoon. Ideally a cartoon set will provide examples that come from several different perspectives and take several different positions as they communicate political commentary through their imagery and words. Model how one can “read” a cartoon and its details to determine the point or commentary communicated by the cartoon, and thus determine its *position* (which may or may not be stated). Finally, model how a cartoon artist presents visual details as *evidence* that establishes and supports the cartoon’s position.

Following this modeling and some guided practice, students might then work in teams with a cartoon set. The questioning and analysis sequence might begin with a general text question(s) from the *Reading Closely for Details: Guiding Questions* handout, such as:

Which key details stand out to me as I scan the cartoon/text? How are these details keys to understanding the cartoonist’s/author’s perspective? What does the cartoon/text seem to be saying about the topic – what is its commentary or position?

ACTIVITY 2: IDENTIFYING ELEMENTS OF ARGUMENTATION

The teacher introduces and the class explores the elements of argumentation in a familiar context.

INSTRUCTIONAL NOTES

INTRODUCE ARGUMENT TERMS

Once students have a good understanding of the concept of a *position* on an *issue* and the idea that positions are supported with argumentation, instruction can shift to the specific argumentative elements authors use to explain and defend their positions. The objective of this activity is for students to have a solid conceptual understanding of the elements of an argument and to be able to use a set of terms to identify and analyze them. The **terms for elements of argumentation used in this unit** are *issue, relationship to issue, perspective, position, implications, premise, reasoning, evidence, and chain of reasoning*. Teachers may have already worked with students using different nomenclature and might elect to use that terminology instead. For instance, some might call a *position* a *thesis* or a *premise* a *supporting claim*. This unit is based on a view that *claims* used in the context of *argumentation* are called *premises*. Whatever nomenclature a teacher chooses, it should be used consistently so students develop an understanding and facility with the terminology.

Introduce and describe how authors explain and defend their positions with a series of linked *premises*

(*claims*), developed through a chain of *reasoning*, and supported by *evidence*. When introducing these concepts, it is best to model and practice their use with topics from students’ personal experiences and everyday life that do not require background information.

PRATICE USING ARGUMENTATION TERMS

A *Delineating Arguments* tool can be used as an instructional strategy.

For this activity focus on the terms *position, premise, evidence* and *reasoning*.

- Begin by showing students a basic model of the *Delineating Arguments* tool. NOTE: If using the *Delineating Arguments* tool, teachers can use one of the included models or develop their own that would work better with their students. Talk about each element and its relationship to the other elements as you read the model aloud.
- Have students identify alternative premises and evidence to defend the same position and the reasoning that would connect them.

ACTIVITY 2: IDENTIFYING ELEMENTS OF ARGUMENTATION (CONT'D)

INSTRUCTIONAL NOTES (CONT'D)

- In reading teams have students work with blank tools to develop a different position and argument on the “issue.”
- Have reading teams present their positions and arguments explaining each element. As a class, discuss the way the reading teams applied each element.
- Encourage the students to use the vocabulary terms they have learned. Write the new vocabulary on the board so they can use the words as references for discussion.
- Once students have some facility with the elements, explain to students that they will be using the terminology to analyze and compare various arguments related to the unit’s issue.

ACTIVITY 3: DELINEATING ARGUMENTS

Student teams read and delineate arguments.

INSTRUCTIONAL NOTES

Students next read and analyze Text 4.1, an accessible, foundational argument related to the unit’s issue. Use text-dependent questions to help students attend to key details related to the argument’s position, premises/claims, structure and reasoning, and supporting evidence. Emphasize that at this point students are reading to *delineate* and not yet *evaluate* the argument.

- Students first read the argument independently, considering general guiding questions such as: “What is the author thinking and saying about the issue or problem?” [Guiding Questions Handout]
- Introduce a set of text-based questions to drive a closer reading and analysis of the text’s argument; then have students follow along as the text is read aloud/presented to them.
- In reading teams, students discuss the text-based questions and search for relevant details, highlighting and labeling their text where they identify the various elements of argumentation.
- Teachers/students might also choose to use a blank *Delineating Arguments* tool to structure and capture their delineation.
- Assign each team one or more of the elements of the argument (position, premises, reasoning, evidence) and have them prepare a short presentation for the class about what they have discovered through their analysis of the argument. Emphasize that each team will need to cite specific evidence from the text that supports their analysis.
- As a class delineate the article’s argument by identifying its position, premises, reasoning, and evidence.
- Model the writing of a claim about **how** the author has presented and developed one element of the argument (e.g., its position). Then have students individually write a claim about the author’s use of the element their team studied.

TEXT SET #4: TEXTUAL NOTES

TEXT 4.1: “MIKE ROGERS: NSA SURVEILLANCE PROGRAM ISN'T THE SCANDAL YOU THINK IT IS”

Author: Mike Rogers; **Source/Publisher:** Detroit Free Press; **Date:** June 16, 2013

Complexity Level: Measures at 1360L

Text Notes: This article by House Intelligence Committee Chairman, Representative Mike Rogers, is included as the first sample argument in the set because it is an example of a clearly organized argument, where the perspective is clear from the first sentence, the position is communicated early in the text, and the argument is developed through a series of linked claims or premises, each of which is backed by evidence. Thus, the text

ACTIVITY 3: DELINEATING ARGUMENTS (CONT'D)

TEXT SET #4: TEXTUAL NOTES

should provide good initial practice (and modeling) for students as they study how arguments are constructed.

Rogers lays down several clear and specific points in order to defend the NSA's surveillance program. He begins by stating in clear terms that the NSA's programs "have proved very effective in preventing terror attacks in the U.S. without infringing on Americans' privacy and civil liberties." Students should be able to recognize the terms, concepts and tension to which Rogers refers. The Representative clearly believes that the surveillance programs, which Snowden revealed, do not violate the 4th Amendment and thus do not violate the privacy of U.S. citizens. It is interesting to point out certain argumentative elements in Rogers' article such as his immediate use of a position statement (end of first paragraph), counterargument (beginning of second paragraph), and clear premises at the beginning of each paragraph. The teacher should point out to students how Rogers grounds his reasoning in the fact that the programs are court sanctioned, which to him means they go through a legal review process. Student should be able to trace Rogers' series of claims and evidence used to defend the use of the surveillance programs.

Sample Text-Dependent Questions (to drive closer reading and discussion):

1. What information does Rogers immediately reveal in his article? How are these details important to his argument?
2. Which sentences – taken together – best communicate Rogers' position on government surveillance
3. Rogers lays out a string of claims in paragraph 2. Where does he present evidence to back these claims up? For which does he provide no evidence?
4. In their article in the Washington Post, Gellman and Poitras say, "Late last year, when critics in Congress sought changes in the FISA Amendments Act, the only lawmakers who knew about PRISM were bound by oaths of office to hold their tongues." What evidence does Rogers provide that refutes their claim?
5. How does the evidence provided in this text influence your understanding of the issue of government surveillance and personal privacy ?

ACTIVITY 4: UNDERSTANDING PERSPECTIVE

The teacher leads an exploration of the concept of perspective.

INSTRUCTIONAL NOTES

- Introduce the terms *relationship to issue* and *perspective* to the class. *Relationship to issue* can be defined in this context as a person's particular personal involvement with an issue, given his or her experience, education, occupation, socio-economic-geographical status, interests, or other characteristics. *Perspective* can be defined as how someone understands and views an issue based on his/her current relationship to it and analysis of the issue. Spend some time to explore the various meanings of perspective and how they might relate to how the term is used here.
- Compare the author's perspective to an iceberg, where the author's particular argument or position is clearly seen, but his or her personal relationship and perspective on the issue may or may not be

ACTIVITY 4: UNDERSTANDING PERSPECTIVE (CONT'D)

INSTRUCTIONAL NOTES (CONT'D)

explicitly revealed in the text. Without this perspective, however, the author's position would not be possible; the author's perspective influences how he or she approaches and ultimately defines an issue and eventually a particular position on it.

Revisit the everyday argumentative contexts that the class explored in Activity 2. Discuss the various perspectives of the actors in those situations. Discuss how the actors' personal relationship to the issue influences their perspective. And how their perspective influences their understanding of the issue and their position.

NOTE: Teachers might choose to BEGIN the exploration of perspective by having students refer back to this activity. Teachers could use a Socratic discussion model to lead students to an understanding of perspective by having them explore the various positions and the reasons why the various actors might hold those positions. After students have come to an initial understanding of perspective, teachers could then introduce the terms and their definitions.

ACTIVITY 5: COMPARING PERSPECTIVES

Students analyze and compare perspective in argumentative texts.

INSTRUCTIONAL NOTES

Students revisit Text #4.1 after developing an understanding of how perspective helps shape an author's position and argument.

- The teacher models a claim that analyzes how an author's position on the issue is directly influenced by his or her relationship to it. The teacher can use the argument from Activity 2 to model this claim.
- In reading teams, students write their own claims on how the perspective of Text #4.1's author influences his or her position on the issue.

The remaining texts in Text Set 4 present students with different perspectives, positions, and arguments for students to read and analyze. Students will use these texts to move from guided to independent practice of the close reading skills associated with analyzing an argument.

- Students first read the argument independently, considering general guiding questions such as: "What is the author thinking and saying about the issue or problem?" "What do the author's language and approach suggest about his/her relationship to and perspective on the issue or problem?" "How does the author's relationship to the issue help shape his/her position?" [Guiding Questions Handout]

- Introduce a set of text-based questions to drive a closer reading and analysis of the text's argument; then have students follow along as the text is read aloud/presented to them.
- In reading teams, students discuss the text-based questions and search for relevant details, highlighting and annotating them.
- Students might use a *Delineating Arguments* tool to delineate the author's argument.
- Discuss as a class the author's position, argument, and perspective.
- Model developing an evidence-based claim comparing how the authors have used one of the elements of argumentation differently, as influenced by their perspectives. Then have students individually develop their own comparative EBCs. Note: These evidence-based claims can be developed orally, on paper, or using an *Organizing EBC* tool.
- Teachers may also choose to discuss the various ways authors structure the logical reasoning of arguments.

ACTIVITY 5: COMPARING PERSPECTIVES

(CONT'D)

TEXT SET #4: TEXTUAL NOTES

TEXT 4.2: "LETTER TO ATTORNEY GENERAL ERIC HOLDER"

Author: Representative James Sensenbrenner; **Source/Publisher:** Sensenbrenner.house.gov

Date: September 6, 2013

Complexity Level: At 1270L, this letter from Congressman Sensenbrenner is accessible to most 10th graders.

Text Notes: In this letter to Attorney General Eric Holder, Sensenbrenner asks vital questions concerning the NSA's surveillance program's use of "bulk" information gathering. Students should already be familiar with these methods from reading prior articles. Sensenbrenner's perspective on this issue is interesting for he introduced the original Patriot Act to Congress on October 23, 2001. In this letter, however, he questions the scope of the government's interpretation of the Act, specifically Section 215. Sensenbrenner develops a clear position against bulk collection of data by citing the original intent of the measure ("access to specific records") and by laying out the dangerous implications of the Obama administration's interpretation, namely the bulk surveillance of commercial transactions. He then requests answers to a series of questions related to the government's interpretation of Section 215 of the Act. This letter is of particular interest to students because of it is a primary source document and directly demonstrates the important communications that exist between law makers.

The questioning and analysis sequence might begin with a general text question(s) from the *Reading Closely for Details: Guiding Questions* handout, such as:

What is the author's personal relationship to the topic? How does this influence the author's perspective?

Sample Text-Dependent Questions (to drive closer reading and discussion):

1. To what interpretation does Sensenbrenner refer to in the first paragraph? In reality, what does this interpretation look like?
2. What unstated reasoning does Sensenbrenner use to connect the last sentence of the first paragraph to the details provided in the following paragraph?
3. According to Sensenbrenner, what are the "implications" of the government's interpretation of Section 215?
4. How does Sensenbrenner's use of the word "apparently" in the last sentence of paragraph 4 help you understand his position? How does Sensenbrenner use logic to come to his opinion?
5. How does the evidence provided in this text influence your understanding of the issue of government surveillance and personal privacy?

TEXT 4.3: "TRANSCRIPT: OBAMA'S REMARKS ON NSA CONTROVERSY"

Author: President Barack Obama; **Source/Publisher:** Wall Street Journal - Washington Wire blog;

Date: June 6, 2013

Complexity Level: The text measures at 1170L and should be accessible to most 10th graders. The press conference video [13:47] and transcript are available on the same Washington Wire blog page.

Text Notes: In a press conference held on June 6, 2013, a day after the Guardian newspaper revealed the leaked NSA documents, calling into question the administration's use of secret courts and surveillance programs, President Obama stresses a couple of issues: the legality and transparency of the government's surveillance programs, and the scope of the surveillance. In this one-question press conference, the President assured Americans that "nobody is listening to your telephone calls," but yes to callers' "metadata."

ACTIVITY 5: COMPARING PERSPECTIVES

(CONT'D)

TEXT SET #4: TEXTUAL NOTES

Obama also goes into detail about the process of obtaining the necessary authorization from courts if someone wanted to conduct further probing. He also makes abundantly clear that the programs "have been authorized by broad, bipartisan majorities repeatedly since 2006," and that congressmen and women "have been consistently informed" about the surveillance programs. President Obama's press conference is of particular importance for the unit as he clearly defends the use of surveillance in the fight against terror, though he does so in a way that is more subtle and complex than Rogers' article. Obama first frames his opinion with two commitments he made when he assumed the presidency. These should be considered by the students throughout their reading of the President's remarks. Later, and perhaps most importantly, the President highlights the complexity of the values involved in conducting surveillance programs, admitting that "you can't have a hundred percent security and also then have a hundred percent privacy and zero inconvenience." This position should give students an opportunity to reflect on how the issue they are studying is not necessarily an either/or issue, but one where all sides have important arguments to make. Obama acknowledges this, noting that his team "expanded oversight" and "increased safeguards" of the program due to his own doubts. The teacher should draw students' attention to the way Obama includes his own thought processes as counterarguments, and discuss what effect this has on his persuasiveness.

Students' questioning and analysis sequence might begin with a general text question(s) from the *Reading Closely for Details: Guiding Questions* handout, such as: *What is the author's personal relationship to the topic? How does this influence the author's perspective?*

Sample Text-Dependent Questions (to drive closer reading and discussion):

1. How is President Obama personally related to the issue? What is his perspective on government surveillance and what specific words convey that perspective?
2. In what ways does Obama "set the stage" for his argument on his administration's stance on surveillance?
3. According to the President, what information are the intelligence agencies looking for? What information are they not collecting, according to the President?
4. In his comments, President Obama repeatedly refers to the fact that Congress has been informed of the intelligence community's programs. Why is the President so adamant to make this point?
5. Which details and evidence that Obama cites seem solid and convincing? Which ones seem more questionable?
6. President Obama states, "I think it's important to recognize that you can't have a hundred percent security and also then have a hundred percent privacy and zero inconvenience. You know, we're going to have to make some choices as a society." What does he mean by this statement?

TEXT 4.4: "HOW THE NSA'S SURVEILLANCE PROCEDURES THREATEN AMERICANS' PRIVACY"

Author/Source/Publisher: ACLU; **Date:** June 21, 2013

Complexity Level: At 1500L this text should be challenging to most 10th graders, but the article's clear layout and students' background knowledge on surveillance programs will greatly aid them in approaching this text.

Text Notes: The American Civil Liberties Union is an organization claims to "defend and preserve the individual rights and liberties that the Constitution and laws of the United States guarantee everyone in this country." As such, the organization has come out against the NSA surveillance programs. In this post on its website, the ACLU lays out in 8 clear claims, its argument against government surveillance. The points made in the article both add to and draw from student's knowledge of the issue at this point in the text set.

ACTIVITY 5: COMPARING PERSPECTIVES (CONT'D)

TEXT SET #4: TEXTUAL NOTES

Sample Text-Dependent Questions (to drive closer reading and discussion):

1. How is the ACLU's perspective made immediately clear in the first few paragraphs? In what way do they use the Constitution to put forth their argument?
2. How is the article structured?
3. In what ways does the article's argument coincide with Sensenbrenner's argument? On what points do they agree? On what points does the ACLU article disagree with President Obama and Rogers?
4. According to the ACLU, what kind of information can the NSA collect?
5. Which details and evidence that the ACLU cites seem solid and convincing? Which ones seem more questionable?

ACTIVITY 6: DELINEATING ADDITIONAL ARGUMENTS

As needed, teachers may choose to have students read and delineate additional arguments related to the unit's issue.

INSTRUCTIONAL NOTES

To more fully understand the issue, students may need to explore additional arguments. Possibilities related to the unit's issue are listed in the text set, but teachers and students are also encouraged to find additional texts themselves. (NOTE: this is the point in the unit at which students might embark on further research, guided by the *Researching to Deepen Understanding* unit's activities and resources.)

For each argument read, students might complete a *Delineating Arguments* tool and write an evidence-based-claim about the author's perspective. To broaden the class's access to many arguments, students might work in "expert" teams focused on one or more of the arguments, then "jigsaw" to share their team's findings with students from other teams.

TEXT SET #5: TEXTUAL NOTES

TEXT SET 5 – ADDITIONAL ARGUMENTS:

Students should now be familiar with background information and some seminal arguments about US surveillance programs and the tension between the government's obligation to protect citizens' privacy and security. To further students' background knowledge and ability to analyze the issue, the text set lists several more arguments that students can read and analyze. These texts are current as of fall 2013 and include articles that represent many perspectives on whether the government's surveillance programs violate individual rights or are effective and constitutional tools to help protect the lives of American citizens.

It is anticipated that as the issues and problems associated with the US's surveillance programs evolve, the nature of contemporary arguments and speeches will also change. Therefore, teachers and students are encouraged to look beyond the listed examples and search for more current texts that reflect what pundits, columnists, commentators, politicians, and the public are saying about the issue.

≡ ACTIVITY 7: WRITING TO ANALYZE ≡ ARGUMENTS

Students write short essays analyzing an argument.

INSTRUCTIONAL NOTES

Students use their notes, annotations, and tools to write short essays analyzing one of the arguments they have read thus far in the unit. In their essays, students:

- state the author’s position
- identify the elements of the argument (premises, reasoning, evidence, perspective)
- make an evidence-based claim about how the author’s perspective shapes the position and/or argumentation
- use evidence from the text to support their analysis.

≡ ASSESSMENT OPPORTUNITIES

Part 2 presents many opportunities for formative assessment. The two most important proficiencies to assess here are a student’s:

1. understanding of and facility with the concepts for analyzing arguments; and
2. ability to analyze and write about other authors’ arguments

Teachers can use the tools, claims, and conversations from Activities 2 and 4 to assess emerging proficiency with the analytic concepts without the interference of additional reading comprehension loads. These activities have been designed for development and assessment of these core literacy proficiencies in all students (including ELL and students reading below grade level).

The claims and conversation from Activities 3, 5, and 6 add the opportunity to assess the proficiency in analyzing and writing about other arguments.

The short essay from Activity 7 provides a mid-unit formative assessment on both proficiencies and the ability to link and develop analysis across several paragraphs.

As a formative assessment of the text-centered discussions that have led to their claims, students might complete two *TDC Checklists*, one that rates their team’s overall performance and one that represents a self-assessment of their own participation.

PART 3

EVALUATING ARGUMENTS AND DEVELOPING A POSITION

“The National Security Agency and the FBI are tapping directly into the central servers of nine leading U.S. Internet companies, extracting audio and video chats, photographs, e-mails, documents, and connection logs that enable analysts to track foreign targets”

OBJECTIVE:

Students evaluate arguments, determine which arguments they find most compelling, and synthesize what they have learned so far to establish their own position.

ACTIVITIES

1- EVALUATING ARGUMENTS

Students review and evaluate arguments using objective criteria and their own developing perspective of the issue.

2- DEVELOPING A POSITION

Students synthesize what they have learned about the issue and related arguments to clarify their own developing perspective and to establish a position for their own argument.

3- DEEPENING UNDERSTANDING

If needed, students conduct further research to help develop and support their position.

4- USING OTHERS' ARGUMENTS TO SUPPORT A POSITION

Students identify an argument that supports their position and write an evidence-based claim about why the argument is compelling or makes sense to them.

5- RESPONDING TO OPPOSING ARGUMENTS

Students identify an argument that opposes their position and write an evidence-based claim that either acknowledges the argument's position, points out its limitations, counters its premises, or refutes it as invalid, illogical, or unsupported.

ALIGNMENT TO CCSS

TARGETED STANDARDS:

RI.9-10.6: Determine an author's point of view or purpose in a text and analyze how an author uses rhetoric to advance that point of view or purpose. **RI.9-10.8:** Delineate and evaluate the argument and specific claims in a text, assessing whether the reasoning is valid and the evidence is relevant and sufficient; identify false statements and fallacious reasoning. **RI.9-10.9:** Analyze seminal U.S. documents of historical and literary significance, including how they address related themes and concepts.

W.9-10.1: Write arguments to support claims in an analysis of substantive topics or texts, using valid reasoning and relevant and sufficient evidence. **W.9-10.2:** Write informative/explanatory texts to examine and convey complex ideas, concepts, and information clearly and accurately through the effective selection, organization, and analysis of content.

SUPPORTING STANDARDS:

RI.9-10.1: Cite strong and thorough textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text. **RI.9-10.2:** Determine a central idea of a text and analyze its development over the course of the text, including how it emerges and is shaped and refined by specific details; provide an objective summary of the text. **RI.9-10.3:** Analyze how the author unfolds an analysis or series of ideas or events, including the order in which the points are made, how they are introduced and developed, and the connections that are drawn between them. **RI.9-10.4:** Determine the meaning of words and phrases as they are used in a text, including figurative, connotative, and technical meanings; analyze the cumulative impact of specific word choices on meaning and tone. **SL.9-10.1:** Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.

W.9-10.9: Draw evidence from literary or informational texts to support analysis, reflection, and research.

MATERIALS:

Text Sets 3-5
Forming EBC Tool
Delineating Arguments Tool
EBA Criteria Checklist
TCD Checklist
EBA Terms

ACTIVITY 1: EVALUATING ARGUMENTS

Students review and evaluate arguments using objective criteria and their own developing perspective of the issue.

INSTRUCTIONAL NOTES

Having analyzed and compared the perspectives, positions, premises, and evidence for various arguments related to the unit’s issue, students are ready to evaluate the logic and quality of various positions and arguments in order to determine which ones make sense to them.

MODEL EVALUATION

Introduce the *Evidence-Based Arguments Checklist* as a set of criteria for evaluating arguments. Focus on Sections I and II of the checklist for this activity (“Content and Analysis” and “Evidence and Reasoning”). Model how to use the checklist to review and evaluate an argument, using an example from Part 2 of the unit. Think aloud as you explain each of the seven criteria and how it applies to the argument. Model the use of textual evidence in your evaluation.

EVALUATE ARGUMENTS IN READING TEAMS

In reading teams, have students use Sections I and II of the checklist to evaluate another argument they have read thus far in the unit. Have each group share and discuss their evaluation with the class. Ask students to support their evaluations with textual evidence. The teacher may need to model how to lead a text-based discussion where students base their opinions off of the readings to either support or challenge a position.

DETERMINE COMPELLING ARGUMENTS

Explain to students that evaluating an argument involves both an objective, criteria-based assessment of

its strengths and weaknesses, and the consideration of one’s own developing position about the issue. Discuss ways in which readers can determine if an argument is compelling.

In reading teams, students review and evaluate another argument previously read in the unit. Students use the criteria from the *Evidence-Based Arguments Checklist* to objectively rate (as a team) the argument. Students then discuss and compare their opinions about whether the argument is compelling and makes sense to them.

INDIVIDUALLY EVALUATE/SELECT COMPELLING ARGUMENTS

Individually, students review the arguments they have read in the unit and determine which they find most compelling. For these arguments, they also use the *Evidence-Based Arguments Checklist* to be certain that the arguments they favor are ones that meet the criteria for “Content and Analysis” and “Evidence and Reasoning.”

A graphical representation strategy might be useful for reviewing, evaluating, and determining compelling arguments. Such strategies could be done at the student level, where graphs might arrange and represent the various arguments based on students’ perspectives and positions. The class could do this as a whole, posting arguments on the board or around the room, to represent the range of positions.

ACTIVITY 2: DEVELOPING A PERSPECTIVE AND POSITION

Students synthesize what they have learned about the issue and related arguments to clarify their own developing perspective and to establish a position for their own argument.

INSTRUCTIONAL NOTES

- Return to the unit’s problem-based question and the set of debatable questions that students have previously brainstormed and discussed (This could be part of the class KWL). Have students suggest and discuss various ways of responding to those questions, given what they now know about the unit’s issue. Ask students to indicate to which perspective they are currently leaning, and how their thinking is leading them to a position.
- Have students review the evidence-based claims they wrote at the end of Part 1. Have them revise their initial claims based on their current

ACTIVITY 2: DEVELOPING A PERSPECTIVE AND POSITION (CONT'D)

INSTRUCTIONAL NOTES (CONT'D)

- understanding of the issue. They should include new evidence from arguments they encountered in Part 2.
- In reading teams, students review and discuss their EBCs.
 - Once students have discussed their EBCs about the nature of the problem with their reading teams, have each student independently write a short paragraph stating a position they want to take on the issue and for which they want to development a supporting argument.
 - Students return to their reading teams to review each other's positions using the Clarity and Relevance criteria from section 1 (Content and Analysis) from the *Evidence-Based Arguments Criteria Checklist*.

ACTIVITY 3: DEEPENING UNDERSTANDING

If needed, students conduct further research to help develop and support their position.

INSTRUCTIONAL NOTES

- At this point, students will hopefully have sufficient background information/knowledge and evidence to develop an argument related to their position. If not – and especially if they have ventured into an area related to but also somewhat divergent from the focus of texts in the unit – they may need to do additional reading or research. Activities, materials, and resources from the *Researching to Deepen Understanding* unit may be helpful here. One approach articulated in that unit that is relevant here is the idea of “framing” inquiry with a set of questions that need to be investigated. Before conducting additional research, students could identify inquiry paths they feel they still need to explore to develop their argument. This will help them effectively “frame” their research for better efficiency and success.
- Unread texts from the text sets and/or additional suggested texts can be used in this research.

ACTIVITY 4: USING OTHERS' ARGUMENTS TO SUPPORT A POSITION

Students identify an argument that supports their position and write an evidence-based claim about why the argument is compelling and makes sense to them.

INSTRUCTIONAL NOTES

- In developing and supporting their chosen positions, students will need to reference others' arguments related to the unit's issue, and to use those arguments as evidence to support their own. Here students will write a claim that establishes a supporting argument's position and also explains its relevance to their own position.
- Students individually select one or more arguments to use as “building blocks” for their own argument. This is likely to be an argument(s) that they have previously evaluated and found to be sound as well as compelling for them.
 - Students write a multi-part evidence-based claim – or adapt a previously written claim about the argument – that establishes what the argument's position is and why that argument makes sense and is relevant to their own position, citing specific evidence from the argument that they will use to support their own argument. Students should be encouraged to incorporate the perspective and position they drafted in Activity 2.

ACTIVITY 5: RESPONDING TO OPPOSING ARGUMENTS

Students identify an argument that opposes their position and write an evidence-based claim that either acknowledges the argument’s position, points out its limitations, counters its premises, or refutes it as invalid, illogical, or unsupported.

INSTRUCTIONAL NOTES

In developing their own positions and arguments, students must also acknowledge opposing viewpoints and arguments. This could be addressed by writing a “counterargument” – expressing why they think the opposed perspective and position is “wrong.” However, students should also learn that there are many ways to respond to a divergent or opposing argument. Discuss with students how including and addressing opposing arguments within their writing bolsters their credibility as authors as they demonstrate a fuller comprehension of the issue and are able to refute other’s positions objectively.

- Explain and model the various ways that one might respond to an argument that emanates from a different perspective and position:
 1. By acknowledging the argument’s position and the quality of its reasoning, but explaining why one has not found it relevant or compelling.
 2. By noting the limitations of the argument, especially as it applies to one’s own position and response.
 3. By countering one or more of the argument’s premises, offering opposing evidence that calls the claims into question.

4. By pointing out the argument’s poor reasoning or lack of valid evidence, analyzing and evaluating it as invalid, illogical, or specious.
 5. Other approaches, based on the nature of the argument itself.
- If desired, the teacher can introduce argumentative fallacies such as a straw man, ad hominem, and red herrings, noting that these techniques should be avoided in academic argumentation.
 - In reading teams, students discuss an opposing argument and determine ways in which they might respond to it.
 - Students individually select an argument that they want/need to respond to, and determine which of the strategies is best suited to the argument they will counter and their own positions/arguments.
 - Students write a multi-part evidence-based claim – or adapt a previously written claim about the argument – that establishes what the argument’s position is and then counters that argument using one of the modeled strategies, citing specific evidence from the argument to support their evaluation and response to it.

ASSESSMENT OPPORTUNITIES

As formative assessments and building blocks for their final argument, students have now revised their evidence-based claim about the nature of the issue based on their developing perspective. In a paragraph, they have also expressed a position they wish to take on the issue, and they have written two multi-part claims that:

1. Present analyses and evaluations of two arguments related to the unit’s issue.
2. Establish the relevance of one argument’s position and evidence to their own argument.
3. Respond to a divergent or opposing argument in an appropriate and strategic way.
4. Cite evidence from both texts to support their analyses and evaluations.
5. Represent their best thinking and clearest writing.

These pieces should be evaluated for students’ understanding of the issue, the clarity and relevance of the perspective and position, and their analysis of textual evidence.

Student evaluations of the various arguments using the *EBA Checklist* should be evaluated for their conceptual understanding and the validity of analysis.

PART 4

ORGANIZING AN EVIDENCE-BASED ARGUMENT

“It is hereby ordered that, the Custodian of Records shall produce to the National Security Agency upon service of this Order...all call detail records or “telephony metadata” created by Verizon for communications.”

OBJECTIVE:

Students establish and sequence evidence-based claims as premises for a coherent, logical argument around a position related to the unit’s issue.

ACTIVITIES

1- IDENTIFYING SUPPORTING EVIDENCE

Students review their notes, tools, and previously written claims to determine what they will use as evidence to develop and support their position.

2- DETERMINING A LOGICAL APPROACH

The teacher explains various logical models for building an argument, and students determine which approach best fits their position and the argument they intend to write.

3- DEVELOPING AND SEQUENCING CLAIMS AS PREMISES OF THE ARGUMENT

Students review the claims they have previously written (and potentially develop new claims) to determine how they will use them as premises to develop their argument. Students determine a potential sequence for their premises and plan a chain of reasoning for their argument.

4- ORGANIZING EVIDENCE TO SUPPORT CLAIMS

Students list and sequence their claims/premises and then organize and cite sources for the evidence they will use to explain and support each of their premises.

5- REVIEWING A PLAN FOR WRITING AN ARGUMENT

Students review and revise their plans to ensure that they are clear, relevant, coherent, strategically sequenced, well-reasoned, and sufficiently supported by evidence.

Organizing EBC Tool
Delineating Arguments Tool
TCD Checklist
EBA Terms

ALIGNMENT TO CCSS

TARGETED STANDARDS:

W.9-10.1: Write arguments to support claims in an analysis of substantive topics or texts, using valid reasoning and relevant and sufficient evidence.

W.9-10.5: Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.

W.9-10.9: Draw evidence from literary or informational texts to support analysis, reflection, and research.

SUPPORTING STANDARDS:

RI.9-10.1: Cite strong and thorough textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.

SL.9-10.1: Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others’ ideas and expressing their own clearly and persuasively.

≡ ACTIVITY 1: IDENTIFYING SUPPORTING ≡ EVIDENCE

Students review their notes, tools, and previously written claims to determine what they will use as evidence to develop and support their position.

INSTRUCTIONAL NOTES

Having established their perspectives and positions related to the issue, students now inventory what they have learned and what they can use to establish, develop, and support their positions.

- Students gather all their previous reading notes, tools, and short writing pieces for review (NOTE: If students have previously maintained a working file or portfolio, this will be much easier.)

- Students review their notes and materials, sorting out what is relevant to their position and what is not.
- Students determine if what they have is sufficient, or if they need to do any additional reading or research.

≡ ACTIVITY 2: DETERMINING A LOGICAL ≡ APPROACH

The teacher reviews various logical models for building an argument, and students determine which approach best fits their position and the argument they intend to write.

INSTRUCTIONAL NOTES

Present to students, through explanation and examples, an overview of the various ways that arguments can be constructed and organized, referring back to texts read in the unit and/or bringing in additional examples. (NOTE: The range and sophistication of models presented will depend on the age and readiness of students.)

- Teachers might use the Delineating Arguments tool to help explain the various argumentative models and structures authors employ to strengthen their arguments.

- In Part 2, students have discussed and written claims and paragraphs comparing the perspectives and elements of two or more arguments they have analyzed. Students might return to these samples to see how the arguments might serve as a model for their own writing.
- Based on what they now understand about logical approaches and lines of reasoning, students initially determine how they want to approach the organization of their own argument, based both on its nature and their own processes of thinking and writing.

ACTIVITY 3: DEVELOPING AND SEQUENCING CLAIMS AS PREMISES OF THE ARGUMENT

Students review the claims they have previously written (and potentially develop new claims) to determine how they will use them as premises to develop their position. Students determine a potential sequence for their premises and plan a chain of reasoning for their argument.

INSTRUCTIONAL NOTES

- Review with students that premises are a series of claims that need to be backed up by evidence and that lead to the position. Claims become premises in the context of developing an argument, that defend/support/prove a position.
- Students return to and review the claims they have written in the unit, thinking about their relationship to their emerging plan for their argument. Students determine what they can use and how they will adapt each written claim so that it fits coherently into their argument.
- Through review and discussion in reading teams, students determine what they still need to establish in order to develop and prove their argument. Based on peer feedback, they identify additional claims they will need to write, and evidence they will use to support those claims.
- Based on their logical approach and line of reasoning, students organize their claims into a tentative sequence of premises for their argument and record them on an Organizing Evidence-Based Argument tool or a Delineating Arguments tool.

ACTIVITY 4: ORGANIZING EVIDENCE TO SUPPORT CLAIMS

Students list and sequence their claims/premises and then organize and cite sources for the evidence they will use to explain and support each of their premises.

INSTRUCTIONAL NOTES

- Model the use of an *Organizing Evidence-Based Argument* tool or a *Delineating Arguments* tool for a teacher-developed argument related to the unit's issue or problem.
- In reading teams, have students identify evidence that might be used to support the teacher-developed argument and its claims.
- Students individually organize evidence and cite sources on an *Organizing Evidence-Based Argument* tool or a *Delineating Arguments* tool for each of the premises (claims) they will use in their argument.
- Students determine patterns in their evidence and categorize them under their chosen premises, or create new premises to account for evidence.

ACTIVITY 5: REVIEWING A PLAN FOR WRITING AN ARGUMENT

Students review and revise their plans to ensure that they are clear, relevant, coherent, strategically sequenced, well-reasoned, and sufficiently supported by evidence.

INSTRUCTIONAL NOTES

- In reading teams, students individually “talk through” their organizational plans, using specific vocabulary and their *Organizing Evidence-Based Argument* tool or *Delineating Arguments* tool to explain:
 - ◇ Their statement of the issue;
 - ◇ Their chosen perspective and position;
 - ◇ Their logical approach and line of reasoning;
 - ◇ Each of their premises (by reading their claim statements); and
 - ◇ The evidence they will use to support their claims and substantiate their argument.
- Students use the *Evidence-Based Arguments Checklist* to discuss and peer review each other’s organizational plans. Students should focus on the following criteria:
 - “Clarity and Relevance” under section I (Content and Analysis)
 - “Reasoning” and “Use of Evidence” under section II (Evidence and Reasoning)
 - “Relationships Among Parts” criteria under section III (Coherence and Organization).
 - Students adjust, revise, or further develop their plans based on criterion-based peer feedback and self-reflection.

ASSESSMENT OPPORTUNITIES

Students submit their *Organizing Evidence-Based Argument* tools or *Delineating Arguments* tools to the teacher for formative assessment and criterion-based review and feedback before beginning to write their final arguments in Part 5.

As a formative assessment of the discussions in Part 4, students complete two *TCD Checklists*, one that rates their team’s overall performance and one that represents a self-assessment of their own participation.

PART 5

DEVELOPING AND STRENGTHENING ARGUMENTATIVE WRITING

“What do I know?” - Michel de Montaigne, French essayist (1533-1592); first to label his writing an “essay”

“For students, writing is a key means of asserting and defending claims, showing what they know about a subject, and conveying what they have experienced, imagined, thought, and felt.”

[CCSS ELA/Literacy Standards, p. 41]

OBJECTIVE:

Students use a collaborative process to develop and strengthen their writing in which they use clear criteria and their close reading skills in text-centered discussions about their emerging drafts.

ACTIVITIES

1- STRENGTHENING WRITING COLLABORATIVELY: PRINCIPLES AND PROCESSES

Students learn and practice a collaborative, question-based approach to developing and improving writing, using criteria from the unit and guiding questions to begin the drafting and revision process.

2- FOCUS ON CONTENT: INFORMATION AND IDEAS

Students write, discuss, and revise with a focus on articulating their overall ideas with necessary information.

3- FOCUS ON ORGANIZATION: UNITY, COHERENCE, AND LOGICAL SEQUENCE

Students write, discuss, and revise with a focus on the unity of their initial drafts, coherence among their ideas and information, and logic of their organizational sequence.

4 - FOCUS ON SUPPORT: INTEGRATING AND CITING EVIDENCE

Students write, discuss, and revise with a focus on their selection, use, and integration of evidence.

5- FOCUS ON LINKAGES: CONNECTIONS AND TRANSITIONS

Students write, discuss, and revise with a focus on the effectiveness of the connections and transitions they have made, and their use of transitional phrases.

6- FOCUS ON LANGUAGE: CLARITY AND IMPACT

Students write, discuss, and revise with a focus on the quality and variety of their sentences, the clarity of their vocabulary, and the impact of their word choices.

7- FOCUS ON CONVENTIONS: PUNCTUATION, GRAMMAR, AND SPELLING

Students write, discuss, and revise with a focus on the targeted aspect(s) of writing conventions.

8- FOCUS ON PUBLICATION: FINAL EDITING AND FORMATTING

Students write, discuss, and revise with a focus on producing a final quality product.

MATERIALS:

Evidence-Based Writing Rubric

ALIGNMENT TO CCSS

TARGETED STANDARDS:

W.9-10.1: Write arguments to support claims in an analysis of substantive topics or texts, using valid reasoning and relevant and sufficient evidence.

W.9-10.4: Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

W.9-10.5: Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience. **W.9-10.9:** Draw evidence from literary or informational texts to support analysis, reflection, and research. **SL.9-10.1:** Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9-10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.

SUPPORTING STANDARDS:

RI.9-10.1: Cite strong and thorough textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.

RI.9-10.5: Analyze in detail how an author's ideas or claims are developed and refined by particular sentences, paragraphs, or larger portions of a text (e.g., a section or chapter). **RI.9-10.6:** Determine an author's point of view or purpose in a text and analyze how an author uses rhetoric to advance that point of view or purpose. **RI.9-10.8:** Delineate and evaluate the argument and specific claims in a text, assessing whether the reasoning is valid and the evidence is relevant and sufficient; identify false statements and fallacious reasoning.

A COLLABORATIVE, QUESTION-BASED APPROACH TO STRENGTHENING WRITING PRINCIPLES AND PROCESSES

The Core Proficiencies collaborative, question-based approach for developing and strengthening writing is grounded in the French roots of the word “essay” – a term that can guide the way we go about writing as much as designate what we are expected to produce. “Essayer,” in French, means to “attempt” or “try.” As a verb, it actually means the same thing in English. To “essay” is therefore to try, or attempt. So, when we talk about an “essay” (i.e. paper, composition, etc.), we are actually talking about writing “an attempt.”

This influences how we think about what we are asking students to do, and what we ourselves are doing when writing. We can see the piece of writing we are developing as never finished. This is not to say that we do not need to present an unpolished and refined work, but that ideas, theories, information, and our own understanding and perspective of the issues constantly change and evolve. An essay then is an ongoing attempt to clearly communicate something we are thinking about. That idea could result in an argument, an explanation, a narrative, a description, a speech, etc. The motivation, purpose, and audience can change; however, our attempt to gain and present a clear understanding of a specific subject never changes. We may not get there, but we work to get progressively closer, viewing writing, thinking and understanding of a particular topic as a continual work in progress.

If a paper (or idea) is never fully finished, if it is just the next step, then writing an “essay” benefits greatly from a collaborative, question-based process. To think of an “essay” as a process rather than a product suggests that conversation, contemplation, consideration, and revision are all part of the “attempts” to get one’s thinking down on paper so that others can understand and respond to it.

The Core Proficiencies approach to developing and strengthening writing recognizes the iterative nature of an “essay,” while also acknowledging the need to ground the writing process in clear criteria in order to produce a final, polished product. There are many such processes that have been well described in the literature on writing, and many teachers have their own, favored approach to teaching what has become known as “the writing process.” If so, teachers are encouraged to follow what works for them and their students – adding what makes sense from the approaches and activities described here.

LEARNING PRINCIPLES

Central to the Core Proficiencies approach to facilitating the development of student writing are the following working principles:

- **Independence:** Students need to discover and adopt personally effective writing processes to develop their own essays, to become reflective and independent writers who persevere and grow through their attempts, rather than learning and following “*the writing process*” in a rote and mechanical way. Thus, the Core Proficiencies approach to writing and revising is iterative, flexible, and student-driven.
- **Collaboration:** Becoming an independent writer also entails learning to seek and use constructive feedback from others – peers, teachers, audience members – which implies that students develop and value the skills of thoughtful collaboration. Thus, the Core Proficiencies writing classroom relies on text-centered discussions of students’ essays.

A COLLABORATIVE, QUESTION-BASED APPROACH TO STRENGTHENING WRITING: PRINCIPLES AND PROCESSES

- **Clear Criteria:** Clear, commonly understood criteria that describe the essential characteristics of a desired writing product can help students both understand what they are trying to accomplish and participate in focused, criterion-based reviews of their own and their peers' writing. Thus the criteria that drive reflection and conversation in a Core Proficiencies writing classroom focus on critical characteristics of a piece of writing (e.g., the nature of a central claim and its support within an argument) rather than merely on mechanical issues (e.g., the number of sources used to support the argument, or the number of spelling errors).
- **Guiding Questions:** In addition to being based in clear criteria, student processes for developing and reviewing their writing should call on their evolving skills as readers, using guiding and text-based questions to promote "close reading" of their developing drafts. Thus, in a Core Proficiencies writing classroom, students are expected to frame text-based "review questions" before asking a teacher or peer to read an emerging draft.
- **Evidence:** Whether driven by criteria or questions, student conversations and reflections about their writing should be based on specific textual evidence, which they or their reviewers cite when they are discussing both the strengths of a piece of writing and the areas in which it might be improved. Thus, the review process in a Core Proficiencies writing classroom involves making evidence-based "claims" about a piece of writing.

LEARNING PROCESSES

To make these principles come alive, learning activities in a Core Proficiencies writing classroom are designed and sequenced to provide time and support for the "essay" process. Each stage of the process therefore includes the following components:

- **Teacher Modeling:** Each writing activity includes a teacher demonstration lesson, in which the teacher focuses on and models a specific aspect of writing, specific criteria and guiding question(s), and/or an approach to writing/reviewing that will be emphasized in that phase of the process.
- **Guided and Supported Writing:** The bulk of classroom time is dedicated for students to "essay" – to free-write, experiment, draft, revise, and/or polish their writing, depending on where they are in the process, and guided by what has been introduced and modeled in the demonstration lesson.
- **Text-Centered Discussion:** As students write, they are also engaged in ongoing discussions about their writing – sometimes in formal or informal sessions with the teacher, sometimes in structured peer reviews, and sometimes in more spontaneous conversations with a partner. At the center of all discussions are the fundamental principles of: 1) using Guiding or Text-based Questions to examine the writing; 2) applying Clear Criteria when determining and discussing its strengths and weaknesses; and 3) citing Specific Evidence in response to questions and/or in support of claims about the writing.
- **Read Alouds:** Periodically, students have opportunities to publicly share their emerging writing, reading segments to the class (or a small group), and using questions, criteria, and evidence to discuss what they are noticing (and working on) in their own writing.

As practiced in conjunction with a Core Proficiency unit, such as *Developing Evidence-Based Arguments*, the process is sequenced as a series of "attempts" that are intended to produce a specific written product (an argument, explanation, or narrative) that also represents evidence of a student's reading and research skills.

A COLLABORATIVE, QUESTION-BASED APPROACH TO STRENGTHENING WRITING: PRINCIPLES AND PROCESSES

LEARNING PROGRESSION

Thus the approach emphasizes criteria that describe an effective final product and the skills it should demonstrate, questions that are intended to improve the product, and the use of the process to progressively revise and refine a piece of writing. As such, the process moves like a camera lens through an iterative, progressively more focused sequence of activities, including:

1. A broad scanning of the landscape in the initial stages of the “essay” – turning thinking into writing and/or writing one’s way to thinking.
2. An initial, wide-angle view/review of the “big picture” – the thinking behind the writing and the ideas and information it presents (with the idea that until the thinking is clear and well-developed, other revisions are premature).
3. A still broad but somewhat more focused emphasis on organizing, re-organizing, and/or re-sequencing into a logical progression of thinking.
4. A more zoomed-in look at the use and integration of supporting evidence, either through references, quotations, or paraphrasing.
5. A focus on linking ideas – on connecting and transitioning among sentences and paragraphs.
6. Attention to how ideas are expressed – to the writer’s choices regarding sentence structure/variety and language use.
7. A final zoom-in for editing and proofing, with an emphasis on particular language conventions and formatting issues related to the specific writing product.
8. A framing of the finished product so that it effectively communicates for its specified audience and purpose.

Teachers and students can follow this entire progression of writing activities, or chose to emphasize those that are most appropriate for a particular writing assignment and/or a group of students.

Recommended Resource: One of the finest and most helpful resources to support writers as they work to develop and strengthen their writing, and teachers as they facilitate the learning process, is John R. Trimble’s *Writing with Style: Conversations on the Art of Writing* [Longman, 2010; ISBN-13: 978-0205028801]. Trimble begins by discussing the critical importance of “Thinking Well” and of both “selling and serving” one’s reader, and moves from there to concrete tips about writing, revision, and editing. Trimble’s central premise is that effective writers “have accepted the grim reality that nine tenths of all writing is rewriting...” [p.9]. Trimble’s ideas will occasionally be referenced in the unit’s activity sequence, and can provide a valuable supplement to the brief discussions of effective writing presented here. Here are his “four essentials” [p.6]:

1. Have something to say that’s worth a reader’s attention.
2. Be sold on its validity and importance yourself so you can pitch it with conviction.
3. Furnish strong arguments that are well supported with concrete proof.
4. Use confident language – vigorous verbs, strong nouns, and assertive phrasing.

ACTIVITY 1: STRENGTHENING WRITING

COLLABORATIVELY- PRINCIPLES AND PROCESSES

Students learn and practice a collaborative, question-based approach to developing and improving writing, using criteria from the unit and guiding questions to begin the drafting and revision process.

INSTRUCTIONAL NOTES

"I speak to the paper, as I speak to the first person I meet." – Montaigne

In this first activity, students learn about the collaborative, question-based approach to developing and improving writing, and initially practice that approach in the context of "talking out" a first draft. Establishing the culture and routines that accompany this approach will take some time, if they have not previously been part of students' writing classroom experiences. Thus each of the activities in the sequence address the four components described earlier (Modeling, Guided Writing, Text-Centered Discussion, Read Aloud), following the format and model established in this first activity set. As students experience each phase of the activity, explain the purpose and focus of each of these components as students begin work to develop and strengthen their writing.

Teacher Modeling: Because students may begin their first draft from different places of readiness and resources, model (or at least discuss) several possible approaches to drafting, i.e.:

- **Working from Previous Thinking and Planning:** In Part IV, Activity 5, students have used the tools to frame and review an initial plan for their argument that included: their written EBC about the nature of the problem, their position, their logical approach and line of reasoning, the premises/claims that formed the building blocks of their argument, and the evidence they might use to substantiate those claims. Students will also have completed a series of tools and written claims about various arguments they have read. Model how one might use these materials to talk out a first draft as guided and organized by these resources and this emerging plan or outline. [Note: this approach may work best for students who know what they want to argue, have been able to plan a structure for their argument, and/or are most comfortable writing from a pre-existing plan.]
- **Working from a Previously Written Paragraph(s):** Throughout Parts I-IV, students will have composed paragraphs which present and support claims about

the nature of the problem and various arguments written in response to it. One or more of these paragraphs may be a starting point around which to build their argument. Using either a teacher or student example paragraph, model how one can take an existing draft paragraph and either write from it or expand it to produce a more fleshed-out, multi-point argument. [Note: this approach may work best for students who are very happy with something they have already written, or who have trouble getting started and putting words to paper but are more comfortable moving forward once they are started.]

- **Writing to Discover or Clarify Thinking:** Some students may have moved through Parts I-IV with many thoughts in their head about the topic and what they have been reading, but may still be unclear about exactly what position they want to take or how they might argue for it. For these students, model how a less formal "free-write" around the topic – and various questions or ideas that have arisen during the unit - might help them get their thinking out on paper and then discuss it with others. Emphasize that they are "writing their way" to an emergent understanding and sense of direction. [Note: this approach may work best for students who are still uncertain how they feel about the topic/problem or who have difficulty writing a "thesis" and developing an outline prior to writing.]

No matter what approach to drafting students follow, remind them that they are trying to (in Montaigne's words) "Speak to the paper," to work out their thinking so that other's can examine it – and to follow Trimble's essential advice to "Have something to say that's worth a reader's attention."

Guided and Supported Writing: In this first phase of the writing process, students should focus on less formal, more fluid writing, trying first to get their ideas out on paper so that they and others can examine them. Students should be given adequate time and opportunity to write in class, and be expected to produce something "on demand" that can be reviewed by others. They may be taking very different

ACTIVITY 1: STRENGTHENING WRITING COLLABORATIVELY- PRINCIPLES AND PROCESSES

INSTRUCTIONAL NOTES (CONT'D)

approaches to talking out their first drafts, but should be able to explain to others what they are doing and why.

- **Guiding Question:** Present students with a general question to think about as they begin to talk out their initial drafts, and model how that question might relate to any of the three approaches to talking out a draft. Use a question that prompts reflection, such as:

What do I know and think about this topic/problem

How can I help others understand my thinking?

Text-Centered Discussion: As students write, they may also begin to “check in” informally with others - both the teacher and peers.

- Initially, they might simply communicate what their approach to generating a first draft is, and why.
- As their drafts begin to emerge, conversations can be organized by the Guiding Questions: *What do I know and think about this topic/problem? What am I doing to help others understand my thinking?*
- When most students have gotten a first draft out on paper, organize them into review pairs for their first, modeled “close reading” session. For this reading, students will use a familiar process, to examine their partner’s emerging argument a first time. For this session, explain and model the following guidelines:
 - ◇ Reading partners initially listen to each draft as it is read aloud by the writer.
 - ◇ Partners then exchange papers with no additional discussion of what they have written.
 - ◇ Readers analyze the draft, looking especially for textual evidence that expresses the writer’s understanding of the *issue, perspective, and position*. Readers do not evaluate or make suggestions for improvement at this stage.
- ◇ Readers share their analyses with writers, striving to be non-evaluative and *specific, constructive, and text-based* in their observations. (Model observations that either meet or do not meet these criteria for a good response, which will become even more important in later activities.)
- ◇ Writers practice avoiding “yes, but...” responses when receiving feedback – whereby they need to: 1) listen fully to what their reader has observed; 2) wait momentarily before responding verbally; 3) avoid explanations/justifications for what they have done in their writing (e.g., “yes, but I explained my position here...”); and 4) frame instead an informal, text-based question to further probe their reading partner’s observations. This is the routine they will be using throughout all text-centered reviews, and should be modeled and practiced here.
- Based on their partners’ observations and responses to text-based questions, writers determine what they want to continue to work on as they revisit their initial drafts, and return to in-class writing, to the “essay” process.
- Throughout the process, circulate in the room and ask students to share their observations, questions, and reflections with you. Provide feedback and guidance where necessary.

Read Alouds: In this initial activity, these occur informally, in pairs, at the start of text-centered discussions.

ACTIVITY 2: FOCUS ON CONTENT- INFORMATION AND IDEAS

The teacher models a demonstration lesson that focuses on content and the unit’s criteria for information and ideas. Students write, discuss, and revise with a focus on articulating their overall ideas with necessary information.

INSTRUCTIONAL NOTES

“The most fruitful and natural exercise for our minds is, in my opinion, conversation.” – Montaigne

In this classroom writing activity (and all subsequent activity sequences), the same general process and procedures are followed – in this case to support students as they continue to initially draft, or re-draft, an argument that will eventually serve as their final product and summative assessment in the unit. In Activity 1, students have focused on getting their ideas and information on paper, and listening as a reader analyzes what their draft communicates about their understanding, perspective, and position. Students will begin this activity with a new, criteria- and question-based, text-centered discussion that more formally helps them examine and think about the content of their emerging drafts.

Remind them that they will be engaged in thoughtful conversations, to Montaigne “the most fruitful and natural exercise of our minds,” and that they will be using those conversations to address Trimble’s second essential for an effective written argument, to “Be sold on its validity and importance yourself so you can pitch it with conviction.”

Teacher Modeling: The demonstration lesson focuses on the unit’s criteria for [Content and Analysis](#), and how to use those criteria to develop and strengthen a piece of writing. Begin the demonstration lesson by clarifying what the overall writing task is, what the final product will be, and a general timeline for generating, improving, and finalizing that product. Review the [Evidence-Based Arguments Criteria Checklist](#) to clarify that students’ final products will be analyzed and evaluated in terms of a set of criteria that describe:

- I. Content and Analysis
- II. Evidence and Reasoning
- III. Coherence and Organization
- IV. Control of Language and Conventions

- Introduce a general [Guiding Review Question](#) related to the overall content of the writing, and the criteria, i.e.: *What is the writer’s central position, and how does it reflect an understanding of the problem?*
- Provide students with a draft paragraph that represents a skeletal or emerging argument (either

teacher-developed or taken from an anonymous student) and read the paragraph aloud.

- In review teams, have students re-read the draft paragraph in light of the general Guiding Question. Student teams then share text-based responses to the question with the class, as if the teacher is the paragraph’s author.
- Focus students’ attention on the three criteria for Content and Analysis: Clarity and Relevance; Understanding of the Issue; and Acknowledgement of Other Perspectives. Explain/model/discuss what each of these criteria cause one to think about, based on previous work in this and other Core Proficiency units.
- Read closely and study the specific language of one of the [Evidence-Based Arguments Checklist Criteria](#) such as:

Clarity and Relevance: Purposefully states a precise position that is linked to a clearly identified context (topic, problem, issue) that establishes its relevance.

- Model/discuss what specific language in the criterion statement might mean within an argument, e.g., what does it mean to “purposefully state a precise position,” that “is linked to a clearly identified context,” and that “establishes its relevance.”
- With the review criterion as a focus, frame one or more text-based question(s) that you might pose to a reviewer who was going to give you specific feedback about the draft paragraph.
 - ◇ [Text-based Review Question\(s\):](#) *Is my position “purposefully stated”? In sentences 3-5, what helps you as a reader understand its relationship to “an identified context”? What might I add (or revise) to help establish the relevance of my position?*
- Students (individually or in review teams) now read the paragraph closely, considering the text-based review questions and generating a reviewer’s response.

ACTIVITY 2: FOCUS ON CONTENT- INFORMATION AND IDEAS (CONT'D)

INSTRUCTIONAL NOTES (CONT'D)

- Discuss how a text-based response to a draft piece of writing is a kind of “claim” that the reviewer makes based on the criteria, question(s), and specific textual evidence.
 - Model how you might frame a claim-based response if you were a reviewer of the draft paragraph, emphasizing:
 - ◇ A *specific* response that emphasizes both a strength of the paragraph and a potential improvement.
 - ◇ A *constructive* and respectful articulation of the response.
 - ◇ *Text-based evidence* in the paragraph that has led to and supports your response.
 - Guided by this model, students articulate and share their text-based responses and constructive reviewer claims, as if their partners were now the writer of the draft paragraph. Have several students volunteer to present their responses to the whole class, and discuss how the responses are (or are not) *specific, constructive, and text-based*.
 - Model the writer’s behaviors introduced and practiced in Activity 1: 1) listen fully to what readers have observed; 2) wait momentarily before responding verbally; 3) avoid explanations/justifications for what you as a writer have tried to do (no “yes, but…” responses); and 4) frame instead additional informal, text-based questions to further probe your readers’ observations.
 - Discuss what you might do as a writer after considering the responses you have gotten to your text-based review questions.
2. The student whose work is being reviewed then poses a specific Text-based Review Question to guide the reading and review. Reviewers can probe this question to clarify what specifically the writer “wants to know” about his or her draft.
 3. The close reading and review of the draft (or section of draft) then focuses on discussing specific responses to the question, making and sharing reviewers’ claims, and citing specific Textual Evidence from the draft as support for claims about the writing’s overall strengths in terms of ideas and content, and about possible areas for improvement of its thinking and the explanation of that thinking.
- With a reading partner, students engage in and practice this protocol using their emerging draft arguments previously analyzed in Activity 1. Students first frame and share their specific Text-based Review Question. Reading partners read and review the draft, using the question to drive their close reading and search for specific textual evidence. In response to the question, reviewers then share observations and (potentially, if students are ready to do so) suggestions for improvement.
 - Writers practice exhibiting the behaviors of a constructive text-centered discussion: 1) listen fully to what their reader has observed; 2) wait momentarily before responding verbally; 3) avoid explanations/justifications for what they have done in their writing (e.g., “yes, but I explained my position here…”); and 4) frame instead an additional, text-based question(s) to further probe their reading partner’s observations.

Text-Centered Discussion: Before continuing the drafting process, students will engage in their first criterion- and question-based review. This initial review team conference is structured and facilitated by the teacher based on the modeling and practice just completed with the draft paragraph. Discussions follow this protocol:

1. Each discussion begins with the general Guiding Review Question and the Criteria being focused upon.

Guided and Supported Writing: Students will be working to further develop and strengthen their initial draft of their final product, focusing on the overall criteria for Content and Analysis and the feedback they have gotten from reviewers.

- Based on constructive feedback from their readers, students frame a direction and strategy for what they want to work on to improve the Content and Analysis of their arguments.

ACTIVITY 2: FOCUS ON CONTENT- INFORMATION AND IDEAS (CONT'D)

INSTRUCTIONAL NOTES (CONT'D)

- Students work on all or parts of their writing in light of this direction and strategy.
 - Informal conferences – either with the teacher or other students – can occur throughout this writing time, with check-ins about what the writer is working on and how it is going.
- Read Alouds:** Periodically, students might share emerging sections of their drafts, talking about what they are working on in terms of questions and criteria. As some students complete their initial drafts, they might simply read what they have so that students who are not yet finished get a chance to hear what a completed and strengthened first draft might sound like.

ACTIVITY 3: FOCUS ON ORGANIZATION- UNITY, COHERENCE, AND LOGICAL SEQUENCE

The teacher models a demonstration lesson that focuses on organizing ideas and the unit's criteria for organization within the specified writing genre. Students write, discuss, and revise with a focus on the unity of their initial drafts, coherence among their ideas and information, and logic of their organizational sequence.

INSTRUCTIONAL NOTES

"He who establishes his argument by noise and command, shows that his reason is weak." - Montaigne

This activity in the sequence emphasizes issues related to the overall line of reasoning, organization, and unity of the argument. Criteria to be considered in developing and strengthening the writing are drawn from Section III (Coherence and Organization) of the *Evidence-Based Arguments Criteria Checklist*. The learning activity sequence includes the four components of the Core Proficiencies model, as explained and guided in Activities 1 and 2. For this activity, the Text-centered Review Discussions may occur either before or during the Guided Writing phase.

Teacher Modeling: The demonstration lesson focuses on the unit's criteria for Coherence and Organization (Section III of the *Evidence-Based Arguments Criteria Checklist*) and also a criterion from Section II, Command of Evidence. Begin the lesson with a close reading and discussion of the overall descriptor for Coherence and Organization: *"An EBA organizes supported premises in a unified and logical way that clearly expresses the validity of the position."*

- To examine the unity, coherence and logic of an argument's line of reasoning, students can benefit from studying their writing drafts in a "skeletal" form. Model how they might do this with either a

teacher-developed or anonymous student draft (or even a text from the unit's reading). With a highlighter, shade the key sentences of the argument – those that establish its position and each of the premises presented in support of that position – often, but not always, the "topic" sentences. [Alternately, you might just extract these sentences into a separate document or use *Delineating Arguments* or *Organizing EBC* tools.]

- Read the skeletal sentences aloud, with students following. Present students with the Guiding Question and focal criteria (see below). Ask them to re-read the skeletal text and offer observations directly connected to the question and criteria, and to specific evidence from the draft. Based on these observations, model how you might determine a strategy for re-thinking or revising the draft's organization, and a specific text-based review question to guide your work in developing and strengthening the draft - and your readers' review of that draft.

Text-Centered Discussion: Text-centered review discussions will likely happen at the start of the writing/ revising phase of the activity, and again, less formally, with both the teacher and peers, during writing time. Students should begin by "extracting" their skeletal argument (either through highlighting or cutting and

ACTIVITY 3: FOCUS ON ORGANIZATION- UNITY, COHERENCE, AND LOGICAL SEQUENCE (CONT'D)

INSTRUCTIONAL NOTES (CONT'D)

pastings) so that readers can focus on the line of reasoning. Before asking a reader to review a draft, students should formulate their own text-based review questions to direct close reading and evidence-based feedback.

- **Guiding Question:** *What is the organizational pattern (line of reasoning) used by the writer in this argument?*
- **Criteria:** Focus reading, review, and writing on any or all of these criteria from the *Evidence-Based Arguments Criteria Checklist*.

Reasoning: Links evidence and claims/premises together logically in ways that lead to the conclusions expressed in the position.

Relationships among Parts: Establishes clear and logical relationships among the position, claims/premises and supporting evidence.

Effectiveness of Structure: Adopts an organizational strategy, including an introduction and conclusion, which clearly and compellingly communicates the argument.

- **Example Text-based Review Question(s):**
Does my chain of reasoning make sense as a way of demonstrating my position? Is it unified into a coherent argument? How might I rethink, re-sequence, or reorganize my four premises to improve the clarity or logic of my argument?

Guided and Supported Writing: Students will be working to improve the overall line of reasoning and organization of their draft arguments. This may entail re-sequencing their premises, adding additional premises, deleting sections that take the argument off course, or adopting a different organizational plan. In classroom conferences, remind them to focus less at this point on specific issues of expression or conventions, and more on their overall line of thinking from introduction to conclusion.

Read Alouds: Periodically, students might read their skeletal arguments aloud and share what they are doing (have done) to improve organization and their line of reasoning.

ACTIVITY 4: FOCUS ON SUPPORT- INTEGRATING AND CITING EVIDENCE

The teacher models a demonstration lesson that focuses on supporting ideas and the unit's criteria for using and citing evidence. Students write, discuss, and revise with a focus on their selection, use, and integration of evidence.

INSTRUCTIONAL NOTES

"I quote others only to better express myself." – Montaigne

Teacher Modeling: The demonstration lesson focuses on the unit's criteria for use of supporting evidence (Section II. Command of Evidence) and also a criterion related to Coherence and Organization. Begin the lesson with a close reading and discussion of the overall descriptor for Command of Evidence: *An EBA is supported by sufficient evidence and developed through valid reasoning.*

Remind students that supporting evidence may be integrated into an argument through references to other texts or information, citing of data, direct quotations, or paraphrasing. Emphasize also Trimble's reminder that "strong arguments" require "concrete proof" and Montaigne's suggestion that we "quote others only to better express" ourselves – that we do not merely insert quotations, but rather select and use them thoughtfully to develop or support our own ideas.

ACTIVITY 4: FOCUS ON SUPPORT- INTEGRATING AND CITING EVIDENCE (CONT'D)

INSTRUCTIONAL NOTES (CONT'D)

Select a single draft paragraph (one with a highlighted premise from Activity 3) to use in modeling. With a second color highlighter (or with underlining or a symbol system), annotate the paragraph to indicate the evidence that is presented to support the premise. Have students read the paragraph, using the Guiding Question to make observations about the use of evidence. Introduce one or more of the criteria and discuss how you might use those criteria to review and rethink the use of evidence in the paragraph, including discussing where evidence might need to be reconsidered that may not be relevant or credible and/or where new evidence might be added to better support the premise's claim.

Text-Centered Discussion: As in the demonstration lesson, students might begin reviewing and revising a single paragraph of their drafts, to develop their thinking and practice their skills. The writing phase of the activity might begin with a short text-centered discussion using the Guiding Question and one or more criteria to get a sense of issues in the paragraph's use of evidence. Based on this first review, students frame a specific text-based review question and set a direction for revision. As students revise paragraphs, they can discuss with the teacher and peers, using the text-based review question to guide close reading, discussion, and feedback.

Guiding Question: *What sort of evidence has the writer used to support the premise/claim? (Data? References? Quotations? Paraphrasing?)*

Criteria: Focus reading, review, and writing on any or all of these criteria from the *Evidence-Based Arguments Criteria Checklist*.

- **Example Text-based Review Question(s):**
Is my evidence clearly presented? Relevant? Credible? Sufficient? How might I better integrate the evidence in sentences 4 and 5 with the overall discussion? Should I quote or paraphrase?

Guided and Supported Writing: Students will be working to strengthen their use of evidence, which may entail rethinking the evidence itself, inserting new evidence, or reconsidering how they have presented and integrated the evidence into their paragraphs. The guided writing process will be iterative, with students potentially working through several cycles with a single paragraph, then moving on to other sections of their drafts.

Read Alouds: Periodically, students might share single paragraphs they are working on, reading them aloud and then discussing what they have come to think about their use and integration of supporting evidence.

Use of Evidence: Supports each claim/premise with valid inferences based on credible evidence.

Thoroughness and Objectivity: Represents a comprehensive understanding of the issue where the argument's claims/premises and supporting evidence fairly addresses relevant counterclaims and discusses conflicting evidence. (*addressing counterclaims is not a CCSS requirement at 6th grade*)

Relationships among Parts: Establishes clear and logical relationships among the position, claims/premises and supporting evidence.

Responsible Use of Evidence: Cites evidence in a responsible manner that anticipates the audience's knowledge level, concerns, values, and possible biases. Quotes sufficient evidence exactly, or paraphrase accurately, referencing precisely where the evidence can be found.

ACTIVITY 5: FOCUS ON LINKAGES- CONNECTIONS AND TRANSITIONS

The teacher models a demonstration lesson that focuses on linkages among ideas, sentences and paragraphs. Students write, discuss, and revise with a focus on the effectiveness of the connections and transitions they have made, and their use of transitional phrases.

INSTRUCTIONAL NOTES

"There are no truths, only moments of clarity passing for answers." – Montaigne

Introduce the idea of connections and transitions. A basic criteria can be whether a reader can read from sentence to sentence and paragraph to paragraph without running into a disconcerting bump or jump in the flow of the writing.

The *Connecting Ideas* handout can be used to focus students on specific transitional words and ways to link ideas through syntax (e.g., using parallel structure).

Teacher Modeling: The demonstration lesson focuses on making effective linkages among sentences and paragraphs. Once the overall organizational pattern of the argument has been strengthened in Activity 3 and its integration of evidence has been worked on in Activity 4, students may be ready to focus more specifically on making smooth connections and transitions.

Select several examples from anonymous students that could use improvement in their linking of ideas – first a single paragraph (to focus on sentence connections) and then multi-paragraph (to focus on paragraph transitions). Read the drafts aloud and have students listen for places where they get lost or detect a jump or bump in flow (you might have students stand up or raise their hands to indicate when they detect an uncomfortable linkage). Using the *Connecting Ideas* handout, introduce/review the ways word and syntax can be used to repair "bumps in the road" and "build bridges among ideas." Have students suggest ways to improve the example drafts.

Text-Centered Discussion: Students will read/review each others' drafts looking for places where they detect a jump, bump, or unclear linkage. They might use a symbol system to indicate such places on the draft.

- **Guiding Question:** *Where might a reader get lost, feel an uncomfortable jump in the flow of the writing, or misunderstand the linkage among ideas?*
- **Criteria:** Focus reading, review, and writing on criteria related to connections and transitions among ideas (identified by the teacher).
- **Example Text-based Review Question(s):** *In paragraph 3, I want to link several pieces of evidence from different sources; how might I better indicate their connections? Between paragraphs 4 and 5, I transition from a supporting premise to a counterargument; how might I make a better transition to indicate this shift in reasoning?*

Guided and Supported Writing: Students will be doing "close reading" and "close writing" to work on specific spots in their drafts where the linkages are unclear or need strengthening. They will likely benefit from ongoing conferencing, so that they are aware of readers' experiences with their draft.

Read Alouds: Periodically, students might read and share two, linked paragraphs they have revised to improve either the connections among sentences or the transitions among paragraphs.

ACTIVITY 6: FOCUS ON LANGUAGE-CLARITY AND IMPACT

The teacher models a demonstration lesson that focuses on language and the unit’s criteria for expression and word choice. Students write, discuss, and revise with a focus on the quality and variety of their sentences, the clarity of their vocabulary, and the impact of their word choices.

INSTRUCTIONAL NOTES

“No-one is exempt from speaking nonsense – the only misfortune is to do it solemnly.” – Montaigne

Teacher Modeling: The demonstration lesson(s) focus on the unit’s criteria for Control of Language, with a goal that students will work to make their writing both clear and confident. Students will work on sentence structure and word choice with demonstration lessons tailored to the specific demands of the writing assignment, issues related to its audience, and/or their particular needs as writers. Some possible areas for teacher modeling and student workshop focus are:

Clarity of syntax and diction: Model how a reader can detect unclear sentences and imprecise or confusing word choices, what John Trimble delightfully refers to as “mumbo jumbo – grunts of the mind.” Using an example paragraph, demonstrate how a writer might revise its sentences in response to various detected problems of clarity to, in Trimble’s words, “Phrase your thoughts clearly so you’re easy to follow.” [p. 8] Model how student writers might frame text-based questions for their readers to respond to in text-centered review discussions.

Impact of language: Model how language use – word choices, descriptive and figurative language – can strongly influence the impact of an argument on its reader. Emphasize that a writer makes choices about how to express ideas, and that those choices should reflect what Trimble refers to as “confident language.” Focus, for example, on “vigorous verbs,” modeling how students might highlight all the verbs in one or more of their paragraphs (a short grammar review may be necessary!) and then study, with a reader, how those verbs either contribute to or detract from the impact and confidence of the writing. Model also, how this criterion of “vigor” in verb choices might be used in students’ text-centered review discussions.

Tone: Model the importance of achieving the right tone in an argument by first returning to several of the texts read in the unit, to discuss the tone (and thus perspective) established by their language choices. Be clear about the appropriate tone for the intended writing product, while also emphasizing that trying to “lecture” one’s audience in an argument rarely works. Reference Trimble’s suggestion about how to “serve your reader’s needs”: “Talk to them in a warm, open manner instead of pontificating to them like a know-it-all.” [p. 8] Have students classify arguments they have read as to whether they, as readers, have felt “talked to” or “pontificated to,” in preparation for students’ text-centered review discussions that focus on this distinction.

Text-Centered Discussion:

- **Guiding Question:** The general Guiding Question(s) will be determined by the focus of the demonstration lesson(s) and the review, i.e.: *How easy is it to follow the writer’s thinking? Where do you get lost?* Or *“In what ways does the writer use ‘confident language’ to present the argument?”* Or *“In what ways does the author express the argument in an effective, conversational tone?”*
- **Criteria:** Focus reading, review, and writing on any of the issues discussed in the modeling section, and/or either or both of these criteria from the *Evidence-Based Arguments Criteria Checklist*.

Clarity of Communication: Is communicated clearly and coherently. The writer’s opinions are clearly distinguished from objective summaries and statements.

Word Choice/Vocabulary: Uses topic specific terminology appropriately and precisely.

Style/Voice: Maintains a formal and objective tone appropriate to an intended audience. The use of words, phrases, clauses, and varied syntax draws attention to key ideas and reinforces relationships among ideas.

ACTIVITY 6: FOCUS ON LANGUAGE-CLARITY AND IMPACT (CONT'D)

INSTRUCTIONAL NOTES (CONT'D)

- **Example Text-based Review Question(s):** *In what specific places does a reader feel confused by the writing? In my final paragraph, how confidently and vigorously do I express my ideas and thus bring my argument to a forceful conclusion?*

Guided and Supported Writing: Students will work to improve specific sentence structure and word choice issues focused on in demonstration lessons and text-centered discussions. Writing time might be divided into several phases, to progressively look at a specific

issue (e.g., clarity) before moving to others. Writing and text-centered discussion might thus occur in an ongoing cycle, depending on how many aspects of expression are to be addressed.

Read Alouds: Students will benefit from reading sections of their draft aloud, to a partner or the class, throughout the process, listening (as they read) for places in which they detect such things as lack of clarity, lack of confidence, and/or pontification.

ACTIVITY 7: FOCUS ON CONVENTIONS-PUNCTUATION, GRAMMAR, AND SPELLING

The teacher models a demonstration lesson that focuses on one or more pertinent aspects of writing conventions and the unit's criteria. Students write, discuss, and revise with a focus on the targeted aspect(s) of writing conventions.

INSTRUCTIONAL NOTES

"The greater part of the world's troubles are due to questions of grammar." – Montaigne

Teacher Modeling: The demonstration lesson(s) should focus on whatever aspects of writing conventions seem appropriate, based on: 1) the nature of the written product, and issues that typically arise; 2) students' past writing, and areas in which they have demonstrated a need to improve; 3) aspects of grammar, punctuation, or spelling that have recently been the focus of direct instruction and guided practice. Deciding which of many issues to emphasize is left up to the teacher. However, it is recommended that only a few issues be the focus of any writing cycle, so that students can really concentrate on them instead of being overwhelmed by too many "corrections" that they need to make.

Text-Centered Discussion:

Guiding Question: Based on whatever issues in grammar, punctuation, spelling, etc. are emphasized in demonstration lessons and editing processes.

Criteria: Focus reading, review, and writing on criteria specific to the targeted aspect of grammar, punctuation, or spelling, and overall to this criterion from the *Evidence-Based Arguments Criteria Checklist*.

Conventions of Writing: Illustrates consistent command of standard, grade-level-appropriate writing conventions.

Example Text-based Review Question(s): Will be based on whatever issues in grammar, punctuation, spelling, etc. are emphasized in demonstration lessons and editing processes.

Guided and Supported Writing: Based on whatever issues in grammar, punctuation, spelling, etc. are emphasized in demonstration lessons and editing processes.

Read Alouds: When working on punctuation, students can benefit from read alouds in which they consciously read the indicated punctuation, i.e., pause based on the "road signs" indicated by various punctuation marks. This can help students detect place where additional punctuation may be needed, or where punctuation creates confusion.

ACTIVITY 8: FOCUS ON PUBLICATION- FINAL EDITING AND FORMATTING

The teacher models a demonstration lesson that focuses on final editing and formatting and the unit's criteria for final writing products. Students write, discuss, and revise with a focus on producing a final quality product appropriate for their audience and purpose.

INSTRUCTIONAL NOTES

"There is no conversation more boring than the one where everybody agrees." - Montaigne

"I put forward formless and unresolved notions, as do those who publish doubtful questions to debate in the schools, not to establish the truth but to seek it." - Montaigne

Teacher Modeling: The demonstration lesson focuses on issues to address, and ways to achieve a quality product, when formatting a final draft for "publication" and use with an identified audience. Decisions about what to focus on are left to the teacher, based on the nature of the assignment and the opportunities to use technology to enhance the argument through graphics and document formatting.

Guided and Supported Writing: Students will finalize their written product. This may occur in class, in a computer lab, or outside of school, depending on circumstances.

Text-Centered Discussion: When/if review discussions occur, they should focus on both the correctness and impact of the final written format.

Read Alouds: Students will have spent significant time reading, thinking, and writing to produce their final written argument. A strong way to culminate and celebrate this work is through some sort of public or technology-based presentation: speeches/readings for community members, an in-class symposium on the issue, presentations to other students, or some form of argument-supported debate. The decision of how to best finish the unit in a meaningful way is left to the teacher.

ASSESSMENT OPPORTUNITIES

Students submit their revised essays ready for publication. Teachers can evaluate the essays using the *Evidence-Based Arguments Criteria Checklist*. The *Evidence-Based Writing Rubric* can also provide guidance on proficiency levels demonstrated by various elements of the essay.

Teachers can also evaluate each student's participation in the collaborative writing activities in a variety of ways beginning with the *Text-Centered Discussion Checklist*. They also might collect student revision questions, various drafts illustrating their revisions, as well as feedback on their peers' essay drafts.
